

AKARI SOLUTIONS

Secure Score

Our Approach

Working with IT, Security and Information Governance, we will host a workshop over a half-day to run through the Microsoft Security toolkit and step-through Microsoft Secure Score with a focus on Identity, Office 365 and Devices.

Building out a Good, Better, Best posture roadmap for any organisation wanting to increase their defence in depth strategy or move to zero trust security patterns.

Our good better best process aligns with the NCSC Microsoft 365 guidelines and takes into account all solutions available under the new [Memorandum of Understanding signed by the UK Government in April 2021](#), bringing together Microsoft 365, which includes Modern Workplace offerings such as Teams, the current Azure Pricing Arrangement (APA) and expands into new areas such as Business Applications.

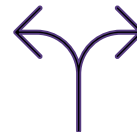

Core Deliverables

Workshop over a half-day with IT, Security or Information Governance

Mapping of Good, Better, Best Objectives

Run-through of Microsoft Security Suite

Identify areas to remediate based on Secure Score Roadmap
