- **UST Omni** is a cognitive design solution leveraging cloud, big data and IoT to provide true supply chain global visibility while enabling responsive orchestration and risk analytics through a digital experience and real time API integration.
- Make existing data actionable in real time, and to move your supply chain from analog to cognitive. Thereby improve your service levels
- Allowing bi-directional data flow to your enterprise systems and eco-system of trading partners-providing visibility from Purchase Order Control to Delivery Receipt and all milestones in between
- Increases supply chain efficiencies, reduces out of stock, improves working capital and revenue in an omni-channel environment with the end goal of improving the customer experience.
- Help FMCG & CPG companies, Retailers, Manufacturers and Logistics Providers can digitize their end-to-end businesses operations, supplier base and logistics networks onto a single platform that provides clear and concise data management.
- A web-based portal gives all users a single version of the truth as well as ability to track & trace in real time
- The elegant UI enables reaction to real time data events; red flag exception events for late shipments and product integrity issues (through IoT sensors), enable collaborative planning and rebalancing of inventory to keep your product on shelves and in the customer's hands.

VALUE - UST's Unique Comprehensive Platform

UST Omni™ End-to-end Supply Chain Visibility Salient Features

USP

- Global integrated visibility lets you orchestrate your entire supply chain on one Platform – a single source of truth
