Customer success:

“The fully integrated Project Operations app allows us to have a seamless experience between our Sales, Project Management and finance departments, speeding up the data gathering and accrual process. It has accelerated our Project delivery. Project Planning is easily managed, maximises our profitability is maximized project are kept within the set budget boundaries.”

Budget

Previously, initial budget overruns were only spotted after the work was delivered and invoiced. Now, the "not-to-exceed limit" functionality makes sure we have the correct conversations about budgets with our customers before they occur, and we don't have to credit them.

Project Planning

Project planning is very flexible and easy to adjust. It is accessible for our Project Managers all over the world, for ongoing projects in any given country.

Resources requirements

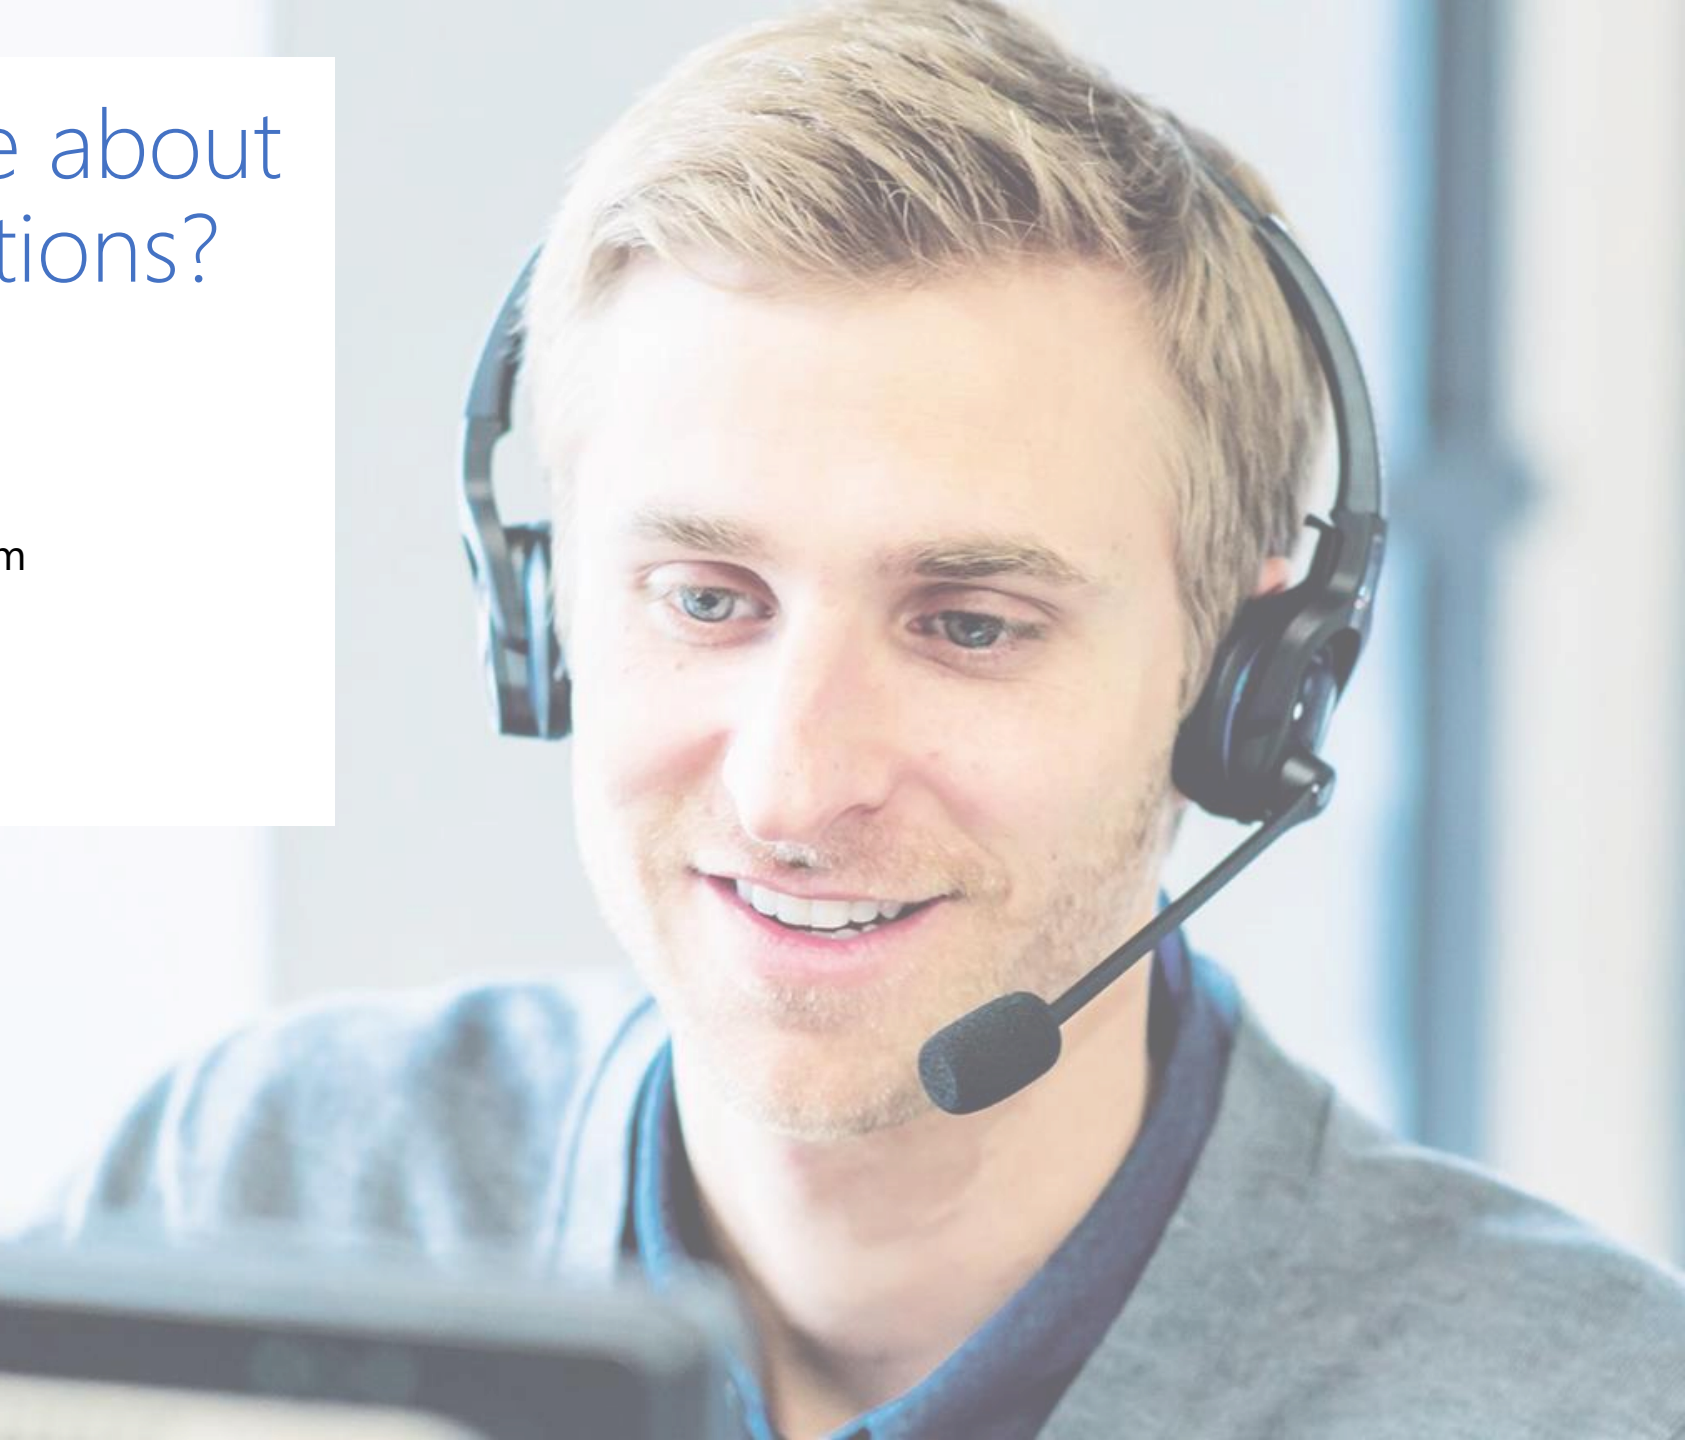

The Resource Planning in Project Operations can be used for all projects, with one central, worldwide archive to choose from. It gives us a perfect overview of the skilled consultants available.
