

HCL Cloud Workspace powered by Azure Virtual Desktop enables Secure Hybrid Work

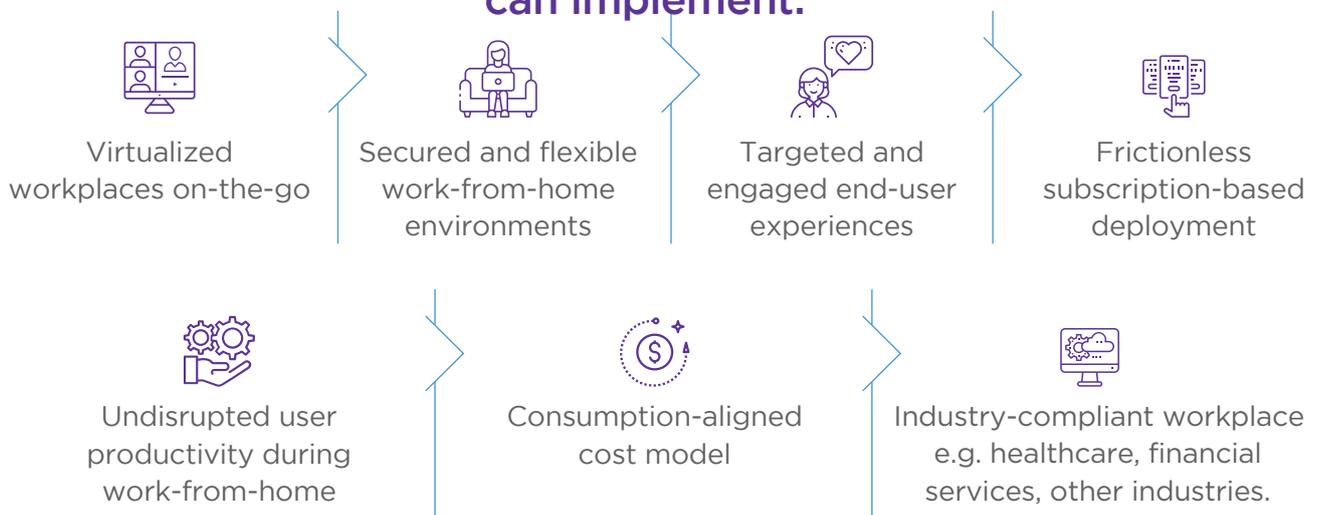

Deploy a modern, secure, cloud-based, virtual workspace that optimizes work-from-anywhere productivity

Global enterprises engaged in remote working operations are faced with the following challenges:

- Lack of flexible, scalable, and connected workplace solutions to respond and adapt to a fluid work environment
- Security and compliance implication when introducing new use cases such as remote work, Bring Your Own Device or better support for contract workers
- Balance cost pressure with the need to deliver excellent user experience and performance to maintain end-user engagement and productivity in the anytime, anywhere working environment

With HCL's Cloud Workspace on Azure, organizations can implement:

The Microsoft Business Unit combines HCL's specialized services and global reach with Microsoft's powerful cloud and business technologies, creating strong and unique offerings for client

- HCL Digital Workplace Services
- HCL Cloud Consulting
- HCL Profile Kaleidoscope™
