Why Choose Delinea

Define the boundaries of access, without the excess.

As organizations continue their digital transformations and move to the cloud, they are faced with increasingly complex privileged access requirements for the expanded threatscape. Privileged access management is complex, but the solution doesn't have to be. At Delinea we believe the opposite of complex isn't simple – it's seamless.

Delinea is a leading provider of seamless privileged access management (PAM) solutions that empower cybersecurity for the modern, hybrid enterprise. We believe every user should be treated like a privileged user and wants seamless, secure access, even as administrators want privileged access controls without the excess. Our solutions put privileged access at the center of cybersecurity strategies by defining the boundaries of access.

With Delinea, privileged access is more accessible.

A partner for modern access requirements

Digital transformation, the cloud, and remote working have created new requirements for how to securely access what is needed to be productive, successful, and secure. Access controls are no different than any other cybersecurity tool—no matter who is using it, they just want it to be invisible and to work seamlessly. That's where we excel.

Whether it's IT, security teams, sysadmins, support teams, or developers, our solutions are easy to use and powerful enough to get the people you need on your side.

Engineered for seamless security

Maintain and evolve your privileged access management program with greater confidence and achieve higher stakeholder adoption levels. Our PAM solutions are designed to reduce complexity and minimize costs by helping delineate the boundaries of access.

Delinea gives users more digital freedom, and gives IT and Security teams more control and greater value in less time.

We're accessible at any size

We're a trusted partner to thousands of organizations around the globe-from small businesses to the Fortune 100-because we make privileged access more accessible for everyone. And we do it while eliminating the need for complex security tools while prioritizing productivity, flexibility, and control.

Whether in the cloud or on-premises, Delinea's solutions are readily customizable, scalable for growth, and powerful enough to secure your organization no matter where it is on its PAM maturity journey.

Secret Server

Discover, manage, protect, and audit privileged access

- Establish a Secure Vault
- Discover Unknown Accounts
- Delegate Access
- Manage Secrets
- · Control Sessions

Server Suite

Protect servers against identity-based attacks

- Elevate Privileges
- Consolidate Identities with AD Bridging
- Enforce MFA Everywhere
- Improve Compliance & Incident Response

囯

Cloud Suite

Secure access to hybrid and multi-cloud infrastructure

- Unify Policy Management
- Enforce MFA Everywhere
- Multi-Directory Brokering

Account Lifecycle Manager

Control and manage service account governance

- · Establish Workflow
- Delegate Ownership
- Provision Service Accounts
- Enforce Governance
- Decommission Accounts

DevOps Secrets Vault

Protect the secrets that DevOps teams and RPA tools need

- Establish Vault
- Centralize Secrets
- · Automate & Scale
- Manage Secrets
- Issue Certificates

Privilege Manager

Implement endpoint application control

- Manage Accounts
- · Define Policies
- **Elevate Applications**
- Improve Productivity

Database Access Controller

Centralize connection security for databases

- Secure Databases
- Manage Privileged Users
- Audit Access
- Modernize MFA
- Proxy Connections

Cloud Access Controller

applications

- Limit URL Access

Connection Manager

Ensure unified management of remote sessions

- Establish Remote Access
- Manage Sessions
- Centralize Control
- Record Sessions
- Track & Audit

Establish Baselines Monitor & Identify Alert

Integrate enhanced reporting,

threat detection, and incident response

Take Action

Secure any web-based

- Apply Granular RBAC
- · Hide Sensitive Data
- Secure Legacy Apps
- · Protect Social Media

Delinea

Delinea is a leading provider of privileged access management (PAM) solutions that make security seamless for the modern, hybrid enterprise. Our solutions empower organizations to secure critical data, devices, code, and cloud infrastructure to help reduce risk, ensure compliance, and simplify security.
