**MAESTRO**

# Axians **MAESTRO** the "IoT orchestrator"

**With MAESTRO we help you to improve your service and maintenance for you and for your customers. Stand out from the competition. Making smarter machines is an efficiency boost, but also the prelude to a new revenue model; customers get data-driven insights, predictive maintenance becomes possible and you can offer your products as-a-service in the future.**

Various industries are undergoing significant changes. With MAESTRO all industries can benefit. A good example is manufacturing. An example: a machine supplier used to sell a machine and - except for a few repairs and replacements - it ended there. Now the manufacturer provides services based on insights and valuable data. Even pay-per-use opportunities come into play.

## THE BEST OF ICT WITH A HUMAN TOUCH

MAESTRO enables organizations to manage assets in a totally new way, like remote monitoring and firmware updates. This way uptime will increase, and disruptions can be reduced.

In addition to asset management, MAESTRO offers an extensive user management module. MAESTRO processes both existing and new to set up data points and uses standard APIs. Machine Learning is used for analyses.

Users have access to graphs and can set up alerts to receive push messages. The platform works with the latest Cloud IoT micro services, thus is always secure and equipped with the latest available components.

## WHY MAESTRO?

To advise your customers about the best product configuration. Or to advise how a machine is used best and more efficiently. This goes for your production line all the same. With predictive maintenance your service becomes smart and you are able to look ahead. A lot of work is taken off the hands of your maintenance department and your customers. Some more characteristics:

- ▶ A safe and scalable solution
- ▶ Use the digital twin device to calculate the effects of decisions
- ▶ Extensive analytics capabilities with Machine Learning
- ▶ Management modules for APIs, users and assets
- ▶ Responsive design with integrated IoT edge technology
- ▶ 24/7 support

## Would you like to know what benefits MAESTRO can offer your company?
