Azure Solutions Briefing

eCloudvalley offers comprehensive services that assist businesses in realizing digital transformation.

We help businesses incorporate new IT architectures and offer new technologies that can be deeply integrated with Azure solutions.

CHALLENGES

Existing infrastructure may afford limited scalability, and it takes too long to install new facilities, preventing businesses from adapting to rapid changes in the industry.

IDEAL SOLUTION

End to end technical support, including existing IT resource assessment, migration to Azure, building cloud architecture, operation and maintenance of Azure resources, and DevOps ...

DESIRED OUTCOMES

Our clients use the services we offer to reduce the costs of hardware, human resources, and maintenance. Further enhance the value of IT infrastructure.

Azure Solutions Briefing: 2-Hour Briefing

Briefing on the key benefits is knowing how to enhance availability, scalability, security, and cost optimization for existing IT infrastructure.

Helping the customer to understand why and how to migrate to Azure.

1

What you will learn

The primary benefits of migrating IT infrastructure to Microsoft Azure.

2

What you will learn

Blueprint of migration to Azure and customer story.

3

Benefits of migrating to Microsoft Azure

Lower CapEx, Business Agility, Systems Security, Unlimited Scalability, and easily management.

eCloudvalley Azure Solutions Briefing: 2-Hour Briefing

Briefing is not a generic sales pitch. Rather a journey of understanding and exploration of your needs and business requests. By the end of the briefing, you will understand what is the benefits of cloud, why to migrate your existing IT resource from on-premises to the Microsoft Azure, and how eCloudvalley can help through your migration journey.

Lower Cost

Migration to Microsoft Azure means ease of scaling with their remote servers. Scaling down is just as easy. This type of agility can give a business a competitive edge and generate tangible TCO savings.

High Availability

Infrastructure and storage on Azure are promised the basic availability SLA. You can even deploy your infrastructure in a multi-region easily.

Easily Maintain

Microsoft Azure provides a powerful web portal to help you manage your cloud resources, and there are a lot of types of managed services on Microsoft Azure that you can choose.
