

Azure Arc Quick Start

Deploying and managing workloads in data centers, across geographical regions, and multiple clouds increases this complexity. Internal IT teams are often left holding the bag on solutions that are not scalable or do not meet the standards of modern architecture; these solutions must also comply with centralized governance, compliance, and regulatory requirements, which create more frustration.

Azure Arc the Coretek Way

Coretek's Smart Enterprise team will lead your organization to adopt Microsoft Azure Arc and simplify your hybrid cloud for better operations and increased agility. As the #1 Azure partner in the US, we retain top tier technical experts who will help you invest in Azure Arc quickly and more strategically.

- Azure Arc offers simplified management, faster app development, and consistent Azure services.
- Easily organize, govern, and secure Windows, Linux, SQL Server, and Kubernetes clusters across data centers, the edge, and multi-cloud environments right from Azure.
- Architect, design, and build cloud-native apps anywhere without sacrificing central visibility and control.
- Get Azure innovation and cloud benefits by deploying consistent Azure data, application, and machine learning services on any infrastructure.

A Multi-factored Approach For Your Hybrid Cloud Needs

Azure Arc Quick Start Options

Arc for Servers

5 days | \$10k

- Discovery workshop
- Automated installation of Microsoft Azure Arc server agents to non-Azure servers
- Configuration of logging and metrics agents on non-Azure servers
- Creation of policy and alerts using Azure policy guest configurations
- Configure IAM & RBAC controls

Arc for Kubernetes

5 days | \$10k

- Defender for Endpoint Configuration and Deployment
- Endpoint Detection and Response
- Exploit Guard
- Application Guard
- Windows 10 Security Baseline for Endpoint Hardening
- Bitlocker Configured and Deployed through Intune with Key Escrow
- Windows Firewall Management
- Conditional Access Additions

Arc for Data

5 days | \$10k

- Hardware vendor and distributor registration with AutoPilot
- Application Packaging
- Hybrid AD or Azure AD join planning
- AutoPilot Profile Configuration
- AutoPilot Pre-Provisioning Profile Creation
- Enrollment Profile Creation
- Base-level Configuration and Compliance Profile Creation
- Pilot with up to 5 devices
