

# Automize Cloud Adoption Framework

Accelerate your cloud adoption journey with our proven Cloud Adoption Framework - we create the foundation for you cloud strategy and help you realize it with confidence using proven guidance and Best Practices. Everything is designed to help you create and implement the business and technology initiatives necessary for your organization to succeed in the cloud.

*“We inspire and explore opportunities with cloud and help find answers to whether cloud is relevant to your business or not.”*

## Define strategy

Define a cloud strategy to drive adoption efforts that unlock business value.

- We help you discover and understand motivations for cloud adoption.
- We locate and define your first cloud adoption project.

## Plan & Assess

Getting the overview and convert goals of your cloud adoption strategy into actions.

- Assess and gain overview of your digital estate.
- Suitable workloads for migration and expected costs.
- Creation of cloud adoption plan to manage change during your journey.

## Ready

Prepare the cloud environment for planned changes.

- Setting up your cloud environment as planned in previous steps.
- Create your Azure migration landing zone and initial foundation.

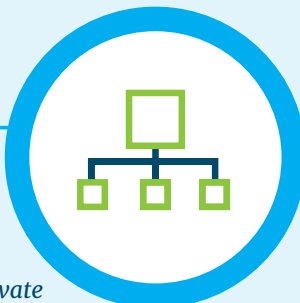

## Adopt

Migrate workloads to the cloud and modernize them to meet your customer needs.

- Migrate or innovate on-premises workloads to Azure.
- We help you take advantage of the cloud and modernize solutions as needed.
- Automize prepares your team and organization for the adoption.

*“Our consultants and cloud architects have designed and planned configurations for the migration and you are now ready for a smooth transition to the cloud.”*

*“Migrate and innovate your digital assets to the cloud and then optimize them and your operational processes with innovative cloud-based technologies.”*

## Govern

Establishing cloud governance and secure well managed setup.

- Create a benchmark to track your governance state.
- Establish and implement an initial governance position.
- Increase your return of investment and lower time-to-market.
- Control costs, manage risks and navigate through complex subscriptions.

## Manage

Automize offers to host your operations and support your IT - no surprises.

- Managed cloud and security.
- Ongoing operations, monitoring and management of cloud workloads.
- Critical continuity of cloud services and applications.
- Best in class support team available.
