Cloud Strategy: 8-week Assessment

Gofore has been helping clients to create successful cloud strategies for the Azure cloud environment for multiple years with great client satisfaction. We can offer a wholesome approach and solution to your needs based on our lengthy experience with leadership and organizational development, cloud governance, DevOps methodology and project and product management.

If you are seeking an end-to-end partner to help you transform your business with a successful cloud strategy, we can offer an experienced and diverse group of experts with advanced skills and experience in cloud maturity assessments, cloud vision statements and data classification.

Our way of working

- Identifying needs using service design and concept design
- Use of agile methodologies for project management
- Cloud governance practices including DevOps methodology

Cloud strategy

- Identifying business goals and changes in the operating environment
- Close examination of the skills of the staff and help to develop them in the cloud age
- Defining business justification and expected outcomes
- Examining the current state of IT service production and identifying the potential for cloud transition
- Roadmapping the steps towards the vision state
