

Complete Visibility Across Your IT Organization

Make sure you see everything you need to see

Is obsolete software putting us at risk?

Which applications are near end of service life (EOSL)?

What categories have the best opportunities for modernization?

Are our critical apps outdated?

How do I control version sprawl?

Which apps can we replace with better alternatives?

Sound business decisions need data that's consistent, complete, accurate and up to date

Today, every business is a technology business. IT leaders need clear visibility into the data and infrastructure supporting their organizations. CIOs, CFOs and IT leaders are continually challenged to deliver more value for every technology dollar invested. But the IT estate is siloed and asset data has a variety of stakeholders. IT asset inventory gaps are common, and usage context is needed. Getting the organization to speak a common language can be a big challenge.

Bad data leads to bad decisions

A complex and dynamic tech landscape can't be effectively managed without a complete and

accurate view of software, hardware, SaaS and cloud resources. Lack of clarity into IT data impedes business initiatives. Leaders need to know:

- When will my applications no longer be supported?
- Am I using outdated versions of integral applications?
- Am I at risk due to obsolete software?
- Am I at risk due to security risks/vulnerabilities?
- What applications can be rationalized in favor of better alternatives?
- How can I control version sprawl of applications to minimize variance, reduce risk and improve support's efficiency?

When asset data isn't clear and reliable, answers can be hard to find, putting the organization at risk.

Gain a single, enriched source of truth for your inventory

Flexera's IT Visibility solution delivers the most comprehensive and clear view of your IT estate. You can leverage only what you can see and with IT Visibility, you'll see assets across your entire tech landscape, collect the right data, and keep it current, curated and enhanced. With the right tool and the right partner, you can gain the visibility you need to reduce manual efforts, enabling you to focus more on strategy while meeting the challenges of the changing business environment.

Flexera IT Visibility helps you gain insight into your application and hardware portfolio.

Flexera delivers the most current, complete view of your IT estate

IT VISIBILITY		
Discovery and normalization	Data enrichment	Unified data visualization
Gain consistent, reliable data and take control of assets to draw valuable insights across software and hardware.	Enhance your IT inventory with market data that improves your decision-making abilities—via Technopedia, the most trusted and comprehensive source of hardware and software asset information in the world.	Simplify the view of your environment with clear understanding, plus analytics that provide context for business initiatives spanning your entire IT estate.

Flexera IT Visibility solution in detail

KEY FEATURES	FLEXERA DIFFERENCE
Discovery and normalization	<p>Top-down visualization of IT assets—including hardware software, open source, SaaS and cloud resources—and operating systems to draw insightful direction. Clean and consistent data across the IT estate, from third-party discovery tools to Flexera’s proprietary discovery and inventory capabilities, including:</p> <ul style="list-style-type: none"> • Microsoft System Center Configuration Manager (SCCM) • ServiceNow Discovery • FlexNet Manager Suite (FNMS) • RISC Foundations Appliance (RN150) • SolarWinds Orion • JAMF Casper • HCL BigFix Platform (formerly IBM Tivoli Endpoint Manager) • HP Universal Discovery (HPUD) • BMC Atrium Discovery and Dependency Mapping (ADDM) <p>Plus the possibility to add others via custom extension integrated with more than 30 other data sources.</p>
Data enrichment and contextualization	<p>Leveraging Flexera’s Technopedia, enhance your data with intelligence that helps drive business initiatives:</p> <ul style="list-style-type: none"> • Lifecycle data (end of service and support) for software and hardware • Focused organizational data for department/organization, location, cost center, domain/host name and users • Export normalized data with enriched lifecycle information • Forecast EOSL issues and avoid security gaps • Business services contextualization: singular business services view of the application portfolio and associated dependencies
Integration	<p>Improve your CMDB and get the most out of your data and your current IT service management providers with direct ServiceNow and BMC Remedy integrations; populate with enriched, normalized content for added clarity and insights.</p>

KEY FEATURES (CONT.)	FLEXERA DIFFERENCE (CONT.)				
Unified data visibility and reporting	<p>See an overview of your IT environment at a glance with dynamic charting and a simple, powerful user interface for hardware and software assets:</p> <ul style="list-style-type: none"> • Total counts of manufacturers, products, versions and categories installed • Data visualization for insights into EOSL position and rationalization opportunities across versions, categories and manufacturers 				
Pre-built, persona-driven insights	<p>Intuitive visualization options for EA, InfoSecurity and ITSM professionals. Dive into graphs and displays to take a closer look at the underlying data.</p>				
	INSIGHTS INCLUDE:				
	<table border="1"> <tr> <td> <p>Total installs Understand and explore your application portfolio.</p> </td> <td> <p>Top manufacturers View top manufacturers to understand partner possibilities.</p> </td> </tr> <tr> <td> <p>Version and category sprawl Understand and rationalize version and category sprawl to reduce licensing costs and simplify your environment.</p> </td> <td> <p>Lifecycle position View upcoming EOSL software releases and make updates, retire software or migrate to mitigate vulnerabilities and support costs.</p> </td> </tr> </table>	<p>Total installs Understand and explore your application portfolio.</p>	<p>Top manufacturers View top manufacturers to understand partner possibilities.</p>	<p>Version and category sprawl Understand and rationalize version and category sprawl to reduce licensing costs and simplify your environment.</p>	<p>Lifecycle position View upcoming EOSL software releases and make updates, retire software or migrate to mitigate vulnerabilities and support costs.</p>
	<p>Total installs Understand and explore your application portfolio.</p>	<p>Top manufacturers View top manufacturers to understand partner possibilities.</p>			
<p>Version and category sprawl Understand and rationalize version and category sprawl to reduce licensing costs and simplify your environment.</p>	<p>Lifecycle position View upcoming EOSL software releases and make updates, retire software or migrate to mitigate vulnerabilities and support costs.</p>				
<p>Data export Download your enriched, normalized data in a CSV format to get additional value and leverage in business intelligence systems.</p>					

Seeing leads to succeeding

The impact of technology on your business will continue to grow. The key to optimizing and leveraging it to maximum advantage is to maintain control, which calls for a level of asset vision only the Flexera IT Visibility solution can deliver. Let's start a conversation today.
