Collect, Collate, Distribute & Improve!

It seems obvious to say, but all businesses want to improve, and all businesses have standards they need to meet! Enter continuous auditing - Smart businesses don't just perform checks and reviews; they use continuous auditing as a vital monitoring tool to highlight any issues and areas for improvement.

The problem with continuous audits is they can be time-consuming.

So what do you do?

You can make do with inflexible technology. You can try and create some custom technology. You can stick with paper or don't audit at all! None of that sound appealing?

Then use a specialist, more flexible, more intelligent and intuitive solution — like **ECAT!** Whether you are conducting cleaning & sanitisation checks, security patrols, equipment & asset maintenance or construction progress and snagging, our platform can save you time and increase efficiency.

ECAT is simple to use. Our versatile audit management software provides you with the ability to get a detailed, clear picture of the status of anything, everywhere in any language.

Save up to
60% in time.

Streamlining Operational Efficiency by up to 30%

Business auditing doesn't have to be a pain. You don't have to drown in paper or grapple with clunky technology. ECAT's specialist, highly flexible, intelligent business software makes auditing faster, easier and smarter.

EASIER: No need for IT people. No software to install. No specialist hardware required. In the cloud, available everywhere. Easy, intuitive interfaces. It has never been easier or faster to conduct safety, hygiene, food or quality reviews.

FASTER: Hosted in the cloud. Your platform up and running in as little as 48 hours. You can quickly begin creating and rolling out your reviews. Users download the intuitive app and with little or no training they are ready to go. Start auditing on phone, tablet or laptop. Your data is instantly available via the ECAT Dashboard.

SMARTER: Intelligent, flexible audit configuration. Extensive automation, let the technology do the work — off-line auditing on your mobile devices. All this supported by our team of experts. A dedicated person will establish your audit details and upload them — enabling you to work smarter.

Businesses are using ECAT to cut costs, improve compliance, strengthen operations & gain a competitive edge.

Outstanding Ongoing Support

You don't have to go it alone. Learn and grow with our support. Every support team member has an in-depth knowledge of auditing and understands our platform upside down and inside out. We don't outsource any aspect of our support, which means you can get straight to the experts. We are here to support you as you plan, set-up, implement and manage your continuous audits. Does your audit need a room or a site adding? Can't remember how to do it? No problem we are here, when we say 'ongoing support' we mean, we are here and we will give you the support you need!

ECAT

IMPLEMENTATION

Straightforward Implementation

Easy to set-up, easy to use, easy to manage. Once we set up your account, you can immediately begin creating and rolling out your check-lists and reviews. Users download the ECAT app and off they go. All data is streamed live to your ECAT dashboards.

- Understanding your needs:** We know how daunting initial set-ups can be. That's why we can take your entire location and complete a bulk upload. No headache, no fuss, that's why we are easier, faster, smarter!
- Create audits:** Easily configure audits on your PC. Not sure where to start? We will help you to decide what's to be checked, what's to be recorded and determine how the system needs to respond i.e. what tasks are to be created and who are they to be assigned to. Then, simply make the audit available to your team.
- Conduct audit:** Users download the ECAT app and can immediately begin recording on their smart-phones, tablets or laptops. The system automatically and instantly creates required tasks and notifications.
- View reports:** All data is immediately streamed to your ECAT dashboards — view summary and detailed reports anywhere, anytime.

Our team is on hand to help with configuration, provide tips for an efficient roll-out, and answer any user, technical or reporting queries. No need for paracetamol as we take the headache out of implementation!
