

Paving the way from Legacy to a Digital Future

Zensar's Modernization Run

Proven Strategies To Transform Mainframes

Mainframe challenges

More than meets the eye

High cost of maintenance and upgrade

Graying of mainframe support skills

Vendor lock-in with costly and long-term agreements

Barrier to innovation

High cost of ownership

Inability to exploit new-age IT

Managing explosive data consumption

Take your business to the next level

Advisory & Consulting

To accelerate business outcomes and financial justification for your transformation journey, Zensar builds a comprehensive digital roadmap to plan and execute large scale transformations seamlessly.

- Enterprise Business Case
- Application Portfolio Rationalization
- Application Cloud Readiness Assessment

Transformation: Migration

Zensar executes your organization's exit strategy from legacy infrastructure, while retaining the capabilities of scalability, resilience, availability, at low-cost with mainframe migration to cloud.

- Re-Platform and Re-host
- Data Migration and Replication Services
- Data Back-up and Archival Services

Transformation: Modernization

Unpack business potential by modernizing your applications and infrastructure to exploit core business IP in mainframe apps and data.

- Rewrite and Refactor
- Re-architect using Digital Offerings
- Source Code Recovery
- DevSecOps Services

Digital Engineering & Operations

Zensar continuously monitors, automates, optimizes and secures operations by deriving insights with award winning Zensar's proprietary NextGen AIOPs platform

- Cloud managed services
- Legacy decommissioning implementation
- End-to-end cloud migration testing
- Digital Security
- Data Engineering

Zensar's methodology

We take a holistic approach to modernization which involves establishing the financial justification - ROI and TCO, Target Reference Architectures, Right Path to Data Strategy and a clear Digital Road Map to the future to maximize the value of your modernization journey.

Zensar provides an end-to-end 6-step framework for planning and executing successful transformations in an agile fashion, where in, the deliverables are incremental, verifiable, approvable and progressive. It covers the critical milestones from initial assessment phase to post migration, hyper-care support and cutover to operations support teams. Our approach enables unprecedented levels of agility with a comprehensive approach that includes strategy, modernization, and long-term transformation.

ZAccelerators for improving quality and reducing time

Zensar has developed predefined architectures, templates and IP accelerators to enable quicker, zero disruption migration to cloud while mitigating risks.
