

Data Science Maturity Assessment

Are you using the full spectrum of your data to inform the business decisions that return value to your customers and grow revenue? Blueprint Technologies has created this assessment tool to help measure the relative maturity of your data science practice, identify key areas of improvement and provide expert guidance.

This assessment covers the following practice areas:

- Data readiness
- Organizational strategy
- Data infrastructure
- MLOps (Machine learning, DevOps and engineering)

What you get:

- Detailed report with 8+ pages of rich insights and customized recommendations
- Score assessing your readiness in each category
- Industry-standard best practices to help you improve
- A roadmap for your organization's data science journey

Who this assessment is for:

- Development team/project leads
- Data Science practice owners
- Data scientists
- Chief Information/Technology Officers
