As a Gold Microsoft partner and owner of a fully internally managed Data Center, Moresi.com is the ideal partner for the design and implementation of Hybrid solutions. In fact, a Hybrid Data Center model allows organizations to take full advantage of each approach - cloud and on-premise - with the ability to split data and balance application workloads across servers and network infrastructures located in different environments.

Azure Stack HCI is the new hyperconverged infrastructure operating system (HCI) deployed as an Azure service that offers the latest security and performance features. With Azure Stack HCI you can modernise your infrastructure, consolidate virtualised workloads and increase efficiency. Moresi.com is able to support you throughout the entire solution lifecycle, from hardware design and procurement to the management of "managed services" such as backups and network and security configurations in order to guarantee the solution's operability.

WHY CREATE A HYBRID INFRASTRUCTURE WITH AZURE STACK HCI

Scalability and cost savings

Modernise your infrastructure, consolidate virtualised workloads and get the efficiency of the on-premises cloud.

Simplified management

Simplify operations by using an easy-to-manage HCI solution that integrates with your environment and popular third-party solutions.

Flexible deployment

Select the deployment scenario that best suits your environment. Choose optimised solutions available from a wide portfolio of hardware, software and utilities.

WHAT YOU GET WITH MORESI.COM ASSESSMENT

01 Hardware

Guidance on sizing and choice of certified hardware

03 Solutions

Configuring solutions within Azure Stack HCI such as Azure Kubernetes Service, Azure Virtual Desktop, Azure Site Recovery, Azure ARC

05 Plan

Project plan for Azure Stack HCI deployment within the customer's network or Moresi.com Data Center

02 Infrastructure

Architectural design for the deployment of a secure and highly reliable Azure Stack HCI infrastructure

04 Guideline

Guidelines and best practices for managing Azure Stack HCI both from an on-premise environment and via Azure Portal
