# What's a Cloud Wallet?

Cloud is essential for most businesses today. If you want to access the big cloud providers' services, you'll need to add a credit card. At the end of each month you get billed (and hope it's not too high!).

That doesn't suit everyone. So we created Cloud Wallet.

### Here's how it works:

Add money to a prepaid wallet (or wallets)

Set recharge limits for your company, departments, or different users

Get notified once you approach these limits

Be reassured that you can't overspend

**Recharge again** and continue using cloud

# What can you do with a Cloud Wallet?

#### Go prepaid with no credit cards

Manage all your cloud bills without registering your credit card number and manage your spending with no surprises.

#### **Get intelligent alerts**

You'll be notified instantly when your spend changes or nears its maximum limit.

#### **Top up hassle-free**

You can use bank transfers, credit cards or digital wallets like Paytm to recharge – we support 82 currencies.

#### Allocate multiple spends

Manage allocation of prepaid limits to your different teams or departments.

#### **Control cloud budgets**

Never exceed your allocated budget (it's simple to add spend limits).

#### Run out of credit?

All your data is kept secure, until you're ready to start again.

# Meet the tech that puts you back in control

#### 3 tier billing & recharge system

You can allocate budgets and create Cloud Wallets for different tiers. Then recharge each one

(For example, University/Department/Student.)

#### Spend analysis

Get reports that analyse your spending at each

## **Cloud Wallet use cases**

#### **Students**

Can learn programming, they don't need to provide a credit card and can't run up a big bill.

#### **Developers**

No longer have to worry about overspending and can use Cloud Wallet's automated cloud formation templates.

#### Hackathons

Startups or enterprises can easily access cloud accounts for hackathons.

#### **Educational institutions**

Can recharge and provide cloud budgets through the 3 tier system for their departments and students.

Don't have to leave space on company credit cards and there's no danger of huge bills.

#### **Enterprise customers**

Recharge at enterprise, department & employee level. Can allocate budgets for testing, staging and learning.

# Now we're the preferred Cloud Wallet partner for 10,000+ users

International Institute of Information Technology Bangalore

# 35% of all cloud spending is wasted <sup>1</sup>

Sounds incredible, but it's tricky to plan your cloud usage needs in advance, so it's easy to end up with oversized or unused capacity.

Meet our new intelligent usage tool, Cloud Control

- Get our AI to find where you can optimise your cloud usage.
- See recommendations on an easy-to-use dashboard.
- Simply upsize or downsize all your cloud resources.
- Stop paying for cloud that you're not using.
- Combine with Cloud Wallet you'll not only avoid overspending but also avoid wasting money too.
