# Create Your Azure Data Warehouse Strategy and Proof of Concept in Six Weeks

## Why Unify:

Unify Consulting is a magnet firm for superstar consultants, respectfully disrupting the consulting industries of Seattle, the Bay Area, Chicago, and Dallas. We help clients modernize their digital footprint and optimize the full potential of their people.

## ***Azure Data Warehouse Running in 6 Weeks***

***Accelerate time-to-value with a selected data sets available for analytics within six weeks!***

## What We Offer

Whether you have already migrated your data to Azure or you are just beginning your journey to the cloud, Unify can help you design and build your cloud data warehouse. Many end user analysts face challenges navigating a complex data lake as they seek the right data for reporting and analytics. The curated data they do find is often not fit for the specific analysis use cases needed leading to hours or even weeks of time and energy preparing data. Unify Consulting can help you create a data warehouse strategy, design, and foundation that avoids these pitfalls. We integrate and conform your data into a canonical data model that can answer a wide variety of questions including questions that you have not yet thought to ask. From there, the data is cleansed and integrated into a more easily understood and consumable source for the end users.

In 6-weeks, you will have the foundation for an end-to-end cloud data warehouse pilot with a selected data source and set of use cases!

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in artificial intelligence, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—Microsoft will meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular integrated development environments trusted by 15M+ developers.

Microsoft embraces open source, drives innovation through collaboration, and contributes back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

**Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.**
