Ransomware Protection with M365 powered by ConvergeOne

In 2020 the FBI's Internet Crime Complaint Center (IC3) received 2,474 complaints identified as Ransomware, with losses of over $29.1 million, and this is just what was reported. While there are many of techniques to infect systems, the most common reported were Email Phishing Campaign, Remote Access Vulnerabilities, and Software Vulnerabilities. Having a strategy, not just a product, to protect against the threats is critical. With ConvergeOne's Defense in Depth Strategy with Microsoft 365 you can feel confident you are doing what you need to protect your organization.

Phishing Protection
Microsoft 365's Defender for Outlook is native protection for your Office 365 email platform takes a comprehensive approach to protect organizations from attacks across the kill chain with it's industry leading AI and automation
