Cloud Data Platform with Azure and Snowflake

UNIFY CONSULTING'S SNOWFLAKE ON AZURE OFFERING

Located in Seattle, San Francisco, Chicago, Silicon Valley, and Dallas, Unify Consulting is a management consulting firm, purpose-built to leave you stronger than when we started. Our versatile and seasoned consultants adapt to your needs and context, so you can accelerate your strategies the right way for the long haul. We bring fresh perspectives, flexible skills, and are willing to take informed risks to deliver the best solution possible.

What customers are saying:

"Unify Consulting helped us get up and running in the cloud quickly and easier than we thought possible!"

WHAT WE OFFER

Every organization wants to make smart decisions. Today, having a data platform that you can trust to provide you with the information you need to gain valuable insights is a necessity; and basing that platform on two of the best data toolkits available today (Snowflake on Azure) is a good place to build that foundation.

Whether you have already migrated your data to Azure (Azure SQL, Azure Data Lake Storage, Azure Blob Storage, etc.) or if you are just beginning your journey to the cloud, Unify can help you with your cloud data platform – and if you don't have your data environment set up yet, no worries! We'll help you understand how to get started and get you on the path to success in the cloud!

In 3-weeks, you will be ready to implement an end-to-end cloud data platform on Azure and Snowflake. During those 3-weeks, Unify Consulting will cover a variety of topics related to building and implementing a modern, cloud-based data platform utilizing Snowflake on Azure and lead, demonstrate and build it with you!

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
