Business Problem

The Client is one of the fastest growing manufacturer in APAC. Recognized as a technology and innovation led producer, Client has a global presence across all continents. They were looking at how they can reduce costs where possible. Legacy Oracle databases are some of the highest cost items in their IT estate. Their current home-grown Sales systems based on Oracle technologies was running on Oracle Infrastructure Cloud (OCI) in Germany, causing latency and other issues. They were looking to migrate that to Southeast Asia Azure Region.

Solution

Benefits

- ✓ Significant reduction in license cost (12 oracle servers) and infrastructure cost.
- ✓ Around 75% reduction in migration effort and in turn cost benefit.
- ✓ Compressed schedule due to automation, core migration time is 8 weeks
