Enhance Employee Experience with Video

Your employee experience just got better. Squigl empowers L&D professionals to easily create engaging, memorable, just-in-time video content for training, on-boarding and more.

Training and Microlearning

From compliance to new products to hard and soft skills that will help your team succeed - training content needs to stick.

By pairing audio with simple images related to keywords in your script, Squigl videos meet the learning needs of nearly 95% of learners.

Learning and Development

Your L&D content doesn't have to be mundane, stale, or forgettable!

Squigl videos is 6x more engaging than traditional videos, ensuring your L&D content is retained. Squigl interactive features such as quizzing and assessments ensure you keep track of training effectiveness.

AI for eLearning

Squigl video content is so cost effective because it uses AI to streamline workflow and condense media production timelines from months to days (or hours).

Squigl enables you to provide employees with just-in-time video content to reduce per-employee costs 50-70%.

The world’s leading organizations boost their employee experience with Squigl!
