

Changing how care is delivered

Provide a connected ecosystem that supports and facilitates seamless caregiving.

Unlock new efficiencies, together with more sustainable and rewarding ways of working.

Save time by simplifying complex workflow management and accelerating informed decision making across your organisation.

Improve team performance through collaboration by easily sharing knowledge to strengthen care pathways and reduce time-to-treatment and care backlog.

“For us in clinical practice, what we really want to be able to achieve is to get the potential for our electronic health record in real time and change that data into information that is meaningful. Power BI has proven to be a really effective interface.”

Ian Reckless, Medical Director
at Milton Keynes University Hospital

Share and maintain good information for all parts of the system to help coordination at a neighbourhood, locality and regional level.

Implement proactive and preventative approaches to care delivery supported by data insights.

Transform healthcare journeys to manage health data at scale, improve the patient experience and coordinate care with the **Microsoft Cloud for Healthcare**.
