

Manage and protect your devices, your apps, and your users

# Endpoint Management Workshop

## Workshop highlights

-  Improve your Secure Score with Microsoft Endpoint Manager
-  Learn how to build management policies that protect your users, company data, and devices
-  Gain insights about your users' endpoints and their compliance with your IT policies
-  Determine the best way to give your users access to the apps they need on the devices of their choosing

*“Modern device management encompasses a wide range of areas including user protection, adding/removing devices, managed applications, end user support, and rolling out new capabilities.”*

**-Forrester 2020 Microsoft 365 Enterprise Total Economic Impact Study**

How are you managing your mobile devices, laptops, and other user endpoints? Do you know if your user's devices are compliant with your IT policies?

## Enable users to be productive, on any device, without compromising IT security

Today's users are looking for more ways to remain productive while working on any device. 95% of organizations allow personal devices in the workspace. All these devices add additional risks, when you consider that 70 million smartphones are lost every year.

With users asking for more ways to work the way that they want, this workshop will show you how to manage both company-owned and user-chosen devices in the cloud.

## Why you should attend

Experience the power of modern device management within your own environment.

This workshop will show you how to leverage intelligent security, risk-based controls, zero-touch provisioning, advanced analytics, and deep integration to the Microsoft products you already use. By attending, you can:

**Learn** how to improve your management capabilities with Microsoft Endpoint Manager.

**Discover & Protect** your endpoints by enforcing policies and deploying security tools.

**Secure** your users' identities with multi-factor authentication & conditional access from any device.

**Enable** your users to be productive with the applications they need, on the devices they want.

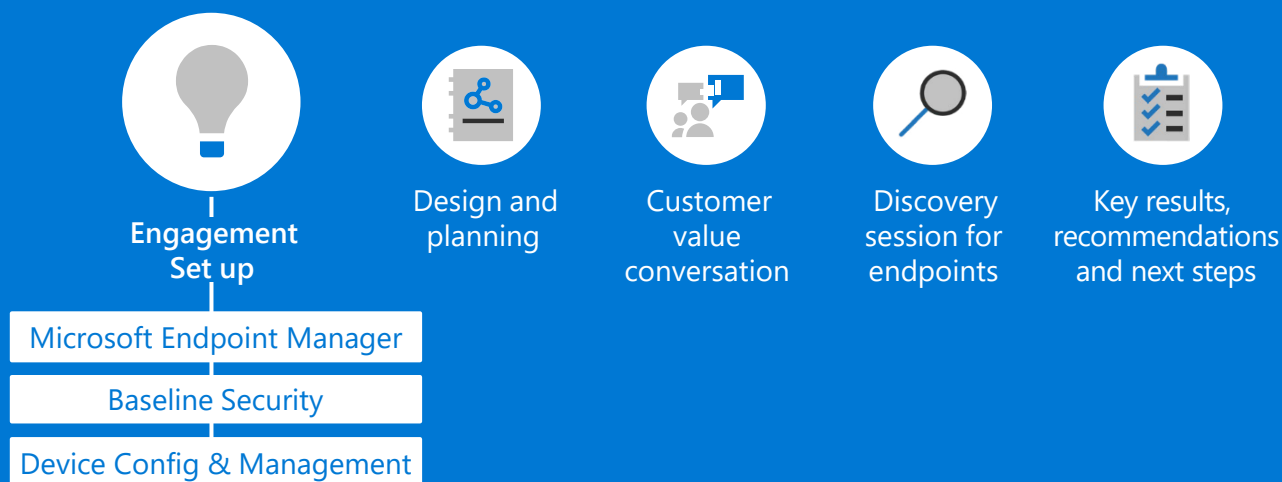

## What to expect

Get an executive deep dive into remote deployment, management, and the security of corporate and BYOD devices in your organization. Our goal is to show you the best ways to manage endpoints at the enterprise level. We'll provide you with the ability to protect your authorized users' identities so you can authenticate credentials and manage access while still giving users the freedom to collaborate with others.

We'll work with you to:

- Learn how to improve your management capabilities with Microsoft Endpoint Manager
- Discover & Protect your endpoints by enforcing policies and deploying security tools
- Secure your identities with multi-factor authentication & conditional access from any device
- Enable your users to be productive with the applications they need, on the devices they want

## We'll customize the workshop based on your organization's needs

## Who should attend

The workshop is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Endpoint & Device Management owners/decision makers
- Application business owners
- IT Security
- IT Operations
- Security Architect
- Security Engineers

## Why Quadra?

Quadra is a global award-winning cloud infrastructure solutions provider, focused on helping customers build agile and intelligent enterprises. Quadra is a trusted technology advisor to India's top business houses and brands, helping them to navigate technological change and complexity, while enabling them to connect technology with business outcomes. Quadra's deep skills and experience, by harnessing a team that possesses more than 750+ professional IT certifications, combined with innovative services and custom IP solutions have helped over 3,000 customers modernize their businesses.
