Microsoft European Showcase Schools Virtual Summit 2022

SHOWCASE SCHOOLS
2021-2022
Microsoft

April 7th | 1 PM CET

The Microsoft Showcase Schools Summit is the go to Conference for School Principals and Educators for sharing knowledge, experience, and best practices in K-12 Education, once again this year, in a digital experience.

Students across the globe are experiencing the digital transformation process that schools are going through, and we need to ensure this transition is relevant and engaging to assure the best possible future outcomes in their lives. Microsoft is aware of the challenges that schools face in this transition and, together with the European Showcase Schools' Advisory Board, will be focusing on 3 key topics in the **Microsoft European Showcase Schools' Virtual Summit 2022** event: **Social Emotional Learning**, **Future Ready Skills**, and **Artificial Intelligence**.

Taking place **Live** on **April 7th** starting at **1 pm CET** via **Teams Live Event**. This event will include keynote sessions from relevant international speakers and Microsoft Education teams, trainings with Subject Matter Experts and best practice sharing. We expect an audience of more than 250 attendees from European countries and we are making all efforts to produce an event that will answer Education trends and, amplify the awareness and leverage the professional development in the 21st Century Schools.
