Changing how care is experienced

Share access to patient and citizen data so you can prioritise personalised care and drive better experiences.

Create personalised and inclusive experiences which work for people and their families where they live.

Enhance patient engagement by helping patients access care on their own terms and interact directly with health teams.

Provide new avenues for care by bringing secure AI health bots and virtual visits into the care journey and expand services to more medical specialities.

"Virtual visits mean that I can see perhaps three or four patients in the time that I would normally spend travelling in the car to see only one".

Judith Vincent, Children's Epilepsy Specialist Nurse, Calderdale and Huddersfield NHS Foundation Trust.

Simplify routine tasks for better patient satisfaction and care transparency.

Create personalised care experiences that centres patient needs by unlocking the power of the **Microsoft Cloud for Healthcare.**
