

HOWELL TECHNOLOGY GROUP AND NETTITUDE

Managed Sentinel XDR

Intelligent cloud security for rapid detection and response.

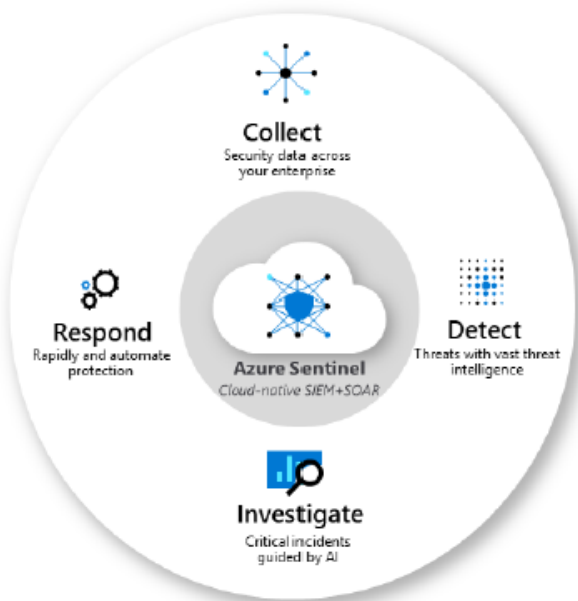

What is Managed Sentinel XDR?

HTG and its strategic security provider Nettitude are award-winning organisations with unparalleled technical and security capability in delivering Cloud Security & Security Operations Centre (SOC) services.

We specialise in Microsoft Azure Sentinel and Defender security tools and through our global SOCs, we can deliver round the clock sophisticated Managed Detection and Response services (MDR, XDR) that leverage Microsoft's leading Azure Security tools.

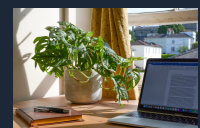

Microsoft Sentinel

- Collect data at cloud-scale across cloud, SAAS infrastructure, users, and on-premise environments
- Built in analytics and 8 trillion cyber signals daily
- Investigate threats with the power of artificial intelligence
- Respond to incidents rapidly with built-in security orchestration and automation (SOAR) of common tasks
- Customisable data storage options available providing cost-effective hot, warm and cold storage, that can be provisioned in any region

Contact us for more information about building a secure, modern workplace with trust and confidence.

Visit www.htg.co.uk/contact-us or call 0330 460 9828

Microsoft Defender

- Enterprise multi platform defence suite providing XDR functionality
- Prevent, Detect, Investigate and Respond
- Advanced Threat protection including anti malware, ransomware protection
- Microsoft Defender can be utilised across endpoint, identity, cloud, infrastructure, and Office365

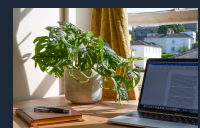

Netitude Managed Service

- 24/7 Global SOC staffed by a highly-certified analyst team
- Managed through Azure Lighthouse multi-tenant management
- Partnered with HTG, a Microsoft Gold Partner with the ability to provide expertise in all Microsoft security products
- Deploy Netitude propriety sophisticated and mature detection suite – we don't use out of the box
- Rapid delivery and assisted onboarding
- Prevent, Detect, Investigate, and near real-time response
- SOAR playbook and use case creation
