

## INTRODUCTION WORKSHOP + ARCHITECTURE/DEPLOYMENT PLAN

- **Introduction workshop** for different options **integrating SAP data into Azure** based data platform
- Many **organizations are struggling** to integrate SAP (ECC/ S/4HANA) data into modern data platform in Azure. Can we use Azure Data Factory HANA? Should we use third party tool like Aecorsoft? Should we ingest data from SAP tables, extractors or via functional modules? Do we need SAP BW for all of this? During this workshop **we will give answer to all of these and more!**
- **Benefits:** As end result customer should have **clear understanding on relevant options to integrate SAP data into Azure based data platform**, pros/cons to their unique environment and initial architecture and deployment plan

## PACKAGED ASSESSMENT
