Managing Dataverse for Teams

When you manage apps for your organization, you control what apps are available to users in your app store. You can tighten control from there by defining what apps are available to specific users through app permissions and app

Dataverse for Teams defined

Dataverse for Teams environments are generated dynamically when a Teams user creates a PowerApp in Teams or installs an app from the catalog.

3 primary areas

1. Power Platform Apps in the Microsoft Teams admin center
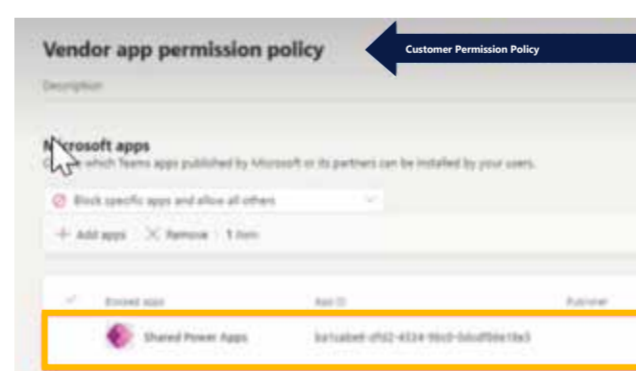

2. Enterprise applications

3. Approval workflow for Dataverse for Teams environments

3 key steps

Manage apps

Limit access to specific users

Add apps to your Teams app store
