# Developing an environment strategy

Think about how your team works and how it interfaces with other teams in your organization. Who needs what levels of access to your environment? Which license and environment types are sufficient? How much control should you maintain or delegate?

## Centralized management versus decentralized management

Only central IT can:

- Provision environments
- Grant admin access
- Manage permissions

Downstream groups can also:

- Provision environments
- Become admins
- Manage permissions

7 admin levels

Global Tenant Admin	Dynamics 365 Service Admin	Power Platform Service Admin
Environment Admin	System Customizer	Custom Dataverse User

3 license types

✓ Makers ✓ Frequent users ✓ Occasional users

7 environment types

Default	Production	Sandbox	Trial	
Developer	Dataverse for Teams	Support
