

Quality Management for Business Central

Who is it for?

Quality Management for Business Central is an app designed to assist any organization wishing to record the results of tests performed by its QC department. Through its fully user configurable lists of test parameters, reference values, and predefined tests to be assigned to each item, the app makes recording QC results and analyzing the already performed tests a breeze. Tests can be performed for purchased, assembled or manufactured items.

It is a perfect tool for:

- Producers or companies who are using production materials
- Manufactures that are obliged to maintain and produce high-quality goods and provide records of the QC tests they perform
- Any company which performs in-house QC testing

The application is integrated with Dynamics 365 Business Central.

Quality Management for Business Central is available on Microsoft AppSource.

How will you benefit from it?

A woman with long dark hair is seen in profile, looking at a computer monitor. The monitor displays a software interface with various data points and charts. In the background, other office workers and computer monitors are visible, creating a professional office atmosphere.

Features

- Create your own list of parameters to be tested
- Create tests by combining parameters you already defined, and assigning acceptable value margins for each parameter
- Activate “Quality Control” as mandatory for different locations
- Implement a precise control of incoming raw materials or output assembled/produced finished goods by assigning predefined tests to each item
- You can choose between an automatic or manual processing of quality control orders when purchasing, assembling or manufacturing an item
- Create a quality control for re-approval of production or materials, which have been already tested
- Ability to edit posted quality control orders
- Access to a quality control print form
