

# DATALOGZ

Easy data discovery and collaboration for any team.

# Industry Shift

**Everyone is interacting with  
data - not just data teams!**

**How much time do you spend  
waiting on data request?**

**Is finding the right dashboard  
like finding a needle in a  
haystack?**

**Can you trust the reports you do find?**

# The Problem

Data use cases and demand are growing rapidly; but, **finding, understanding, and using data is challenging and time-consuming.**

Misreported  
Analytics

Long-time  
to insights

Failed data  
projects

Backlog of  
data requests

# These challenges impact:

**Business teams (i.e Finance, Marketing)** lack skills to efficiently navigate messy data environments resulting in hours of wasted time.

**Data Analysts and Scientists** are missing key context behind their data, often resulting in costly errors.

**Business leaders** suffer from data delays and erroneous analytics.

Data is a black hole at most companies- it's messy, confusing, and undocumented.

# Solution

Index, contextualize, and simplify the entire data ecosystem

Extract tribal  
data knowledge  
from users

Understand cross-  
platform data work  
occurring at  
companies

Map data usage  
using SQL query  
logs and history

Map lineage and  
data governance

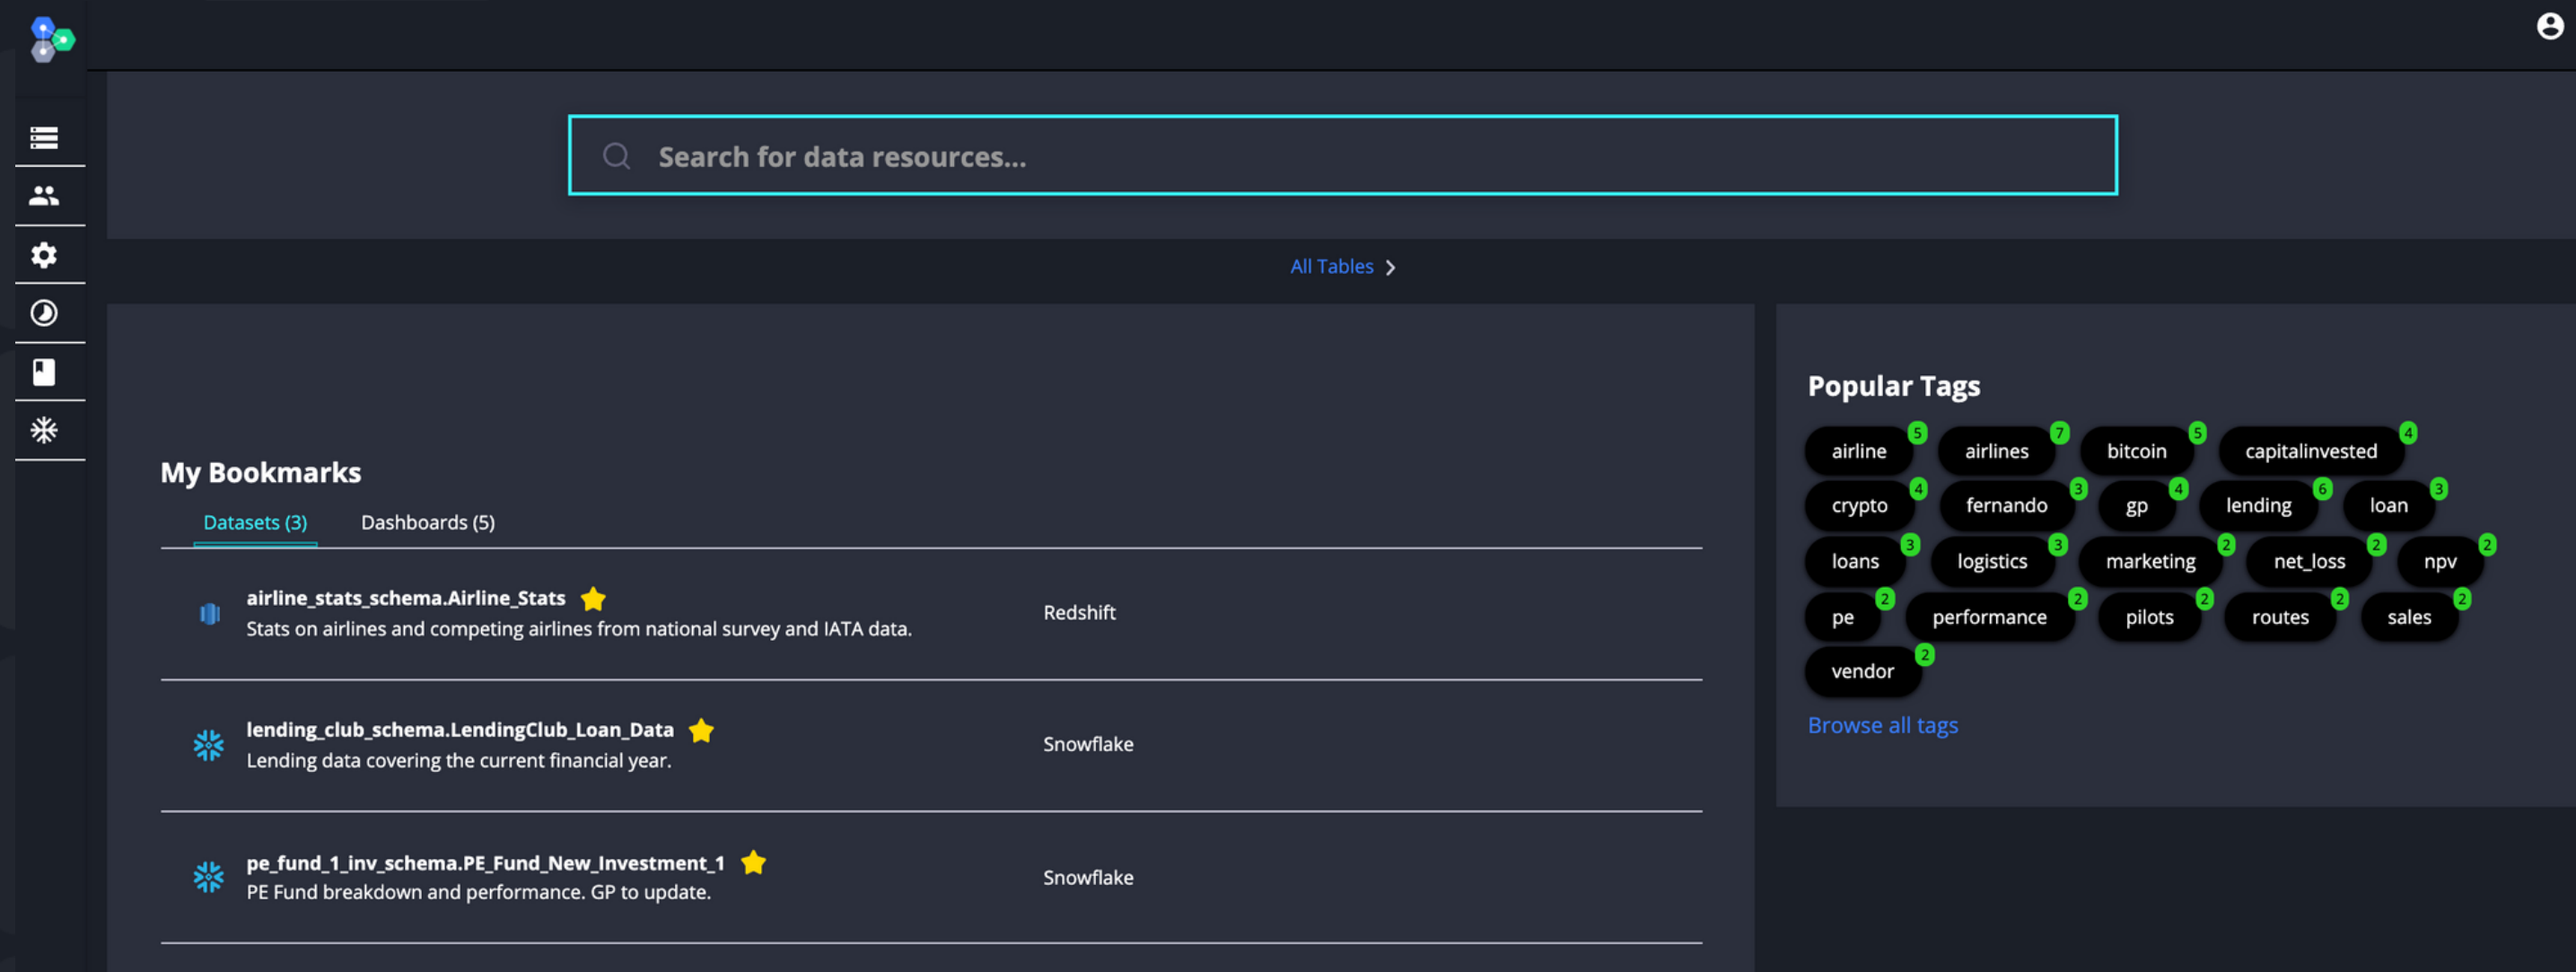

**Unparalleled Data ROI**

# Platform

Like a Google search, instantly find the dashboards, reports, or data you need

**Instant data  
discovery**

**Collaboration  
across data silos**

**Understanding of  
entire data ecosystem**

# Platform

View context behind reports and dashboards

Understand in-depth the data available to you

Frequent Users

Data Quality

★★★★★

# Why is Datalogz unique?

## **Organizing all data knowledge**

We're building the hub for all data interactions. Business data users live here. Data scientists/analysts start here. More integrations, more metadata, more knowledge.

## **Using AI to reduce time to data insights**

We're developing algorithms for non-technical users to be able to input a descriptive word about their project and have instant access to the data they need.

## **Business Leaders love Datalogz**

Citizen data science is a fast-growing movement across data-rich companies. Our core mission is to empower these citizen data users to interact with data directly through Datalogz.

# Building the **future of data management!**
