

# Complete BI Solution (CBIS)

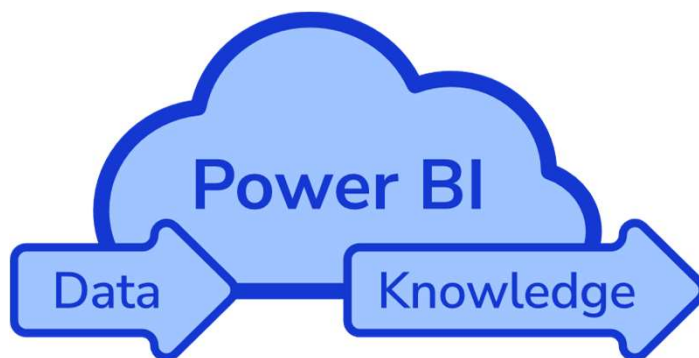

Use complete BI solution to become data-driven company.

**CBIS** - a complete enterprise analytics solution:

- **shorten time-to-market**
- **cost effective** and scalable solution
- quick effects, **first phase in one month**

Use it in every area of your business – sales, HR, warehousing, purchases, accounting, marketing etc.

Thanks to the latest cloud technologies, we will make reports useful like never before - **see the past, react in the present and plan the future freely.**

## Features of CBIS:

- Thanks to Azure DataFactory, we will integrate data from any systems in your company
- With the Snowflake-based data warehouse, we have the ability to analyze huge volumes of data with previously unknown performance.
- Reports in Power BI will allow for ultra-modern data visualization where drawing conclusions becomes easier than ever. Use an agile approach, very dynamic development and our extensive experience to take your company into the group of "data-driven" companies
