Microsoft Azure Foundations

Three in-depth days to build your Microsoft Azure platform

Transparity's Azure Foundations offering is comprised of three 1-day workshops designed to give organisations the opportunity to learn about how Azure services can transform the way they operate and modernise their IT infrastructure. We will cover a number of key areas relevant to your business - including Cloud readiness, hybrid operating models, migration and security - resulting in a fully-built Azure platform onto which you can migrate your IT systems.

What will the workshops cover?

Pre-workshop:
1-hour introductory call

- Define scope of engagement
- Identify stakeholders
- Confirm expectations and next steps

Phase 1:
Workshop and discovery

- Cloud readiness – discussion of current infrastructure/applications
- Hybrid operating models – key use cases and benefits of Public Cloud
- Review in alignment with Microsoft Cloud Adoption Framework
- How to migrate your environment into the Cloud
- Security and standards overview
- How Transparity Managed Services can manage and monitor your infrastructure
- How our tools can help you keep on top of cost control and compliance
- Licencing/support options
- Agree scope for follow-on 2 days of Azure Foundations workshops

Phase 2:
Assessment and provisioning

- Azure Readiness Assessment and review in preparation for implementation
- Provision of Azure subscription and configuration

Phase 3:
Implementation

- Implementation of Azure networking and comms
- Implementation of auditing, governance and management controls
- Support onboarding and handover

Azure Foundations outcomes

- A better understanding of Azure services and how to migrate your on-premise infrastructure
- An Azure environment built and configured ready for you to build on or migrate your services to
- A support package set up so that as you start to build Azure services, you have Transparity's inclusive support to assist you on your Cloud journey
