

FRONTLINE WORKER VALUE MAPPING FOR TEAMS

A New Solution for Modern Work

Microsoft 365 and the capabilities of Teams offers Frontline workers transformational value through an ability to work more efficiently, increase service quality and stay connected to an organization's culture. AMTRA's Frontline Worker Value Mapping for Teams begins with opportunity mining and value mapping, enabling organizations to understand their best candidates to drive Frontline worker transformation.

Once specific functions, processes and services have been identified, AMTRA guides organizations through a prioritization process, then gets you started with solution prototypes in the most impactful areas. Through prototyping, adoption change management and value measurement services, your organization can understand the value of enabling Frontline workers through Teams, and chart a course forward.

BENEFITS

The Right Tools | Tailored technology to address your organization's evolving business needs.

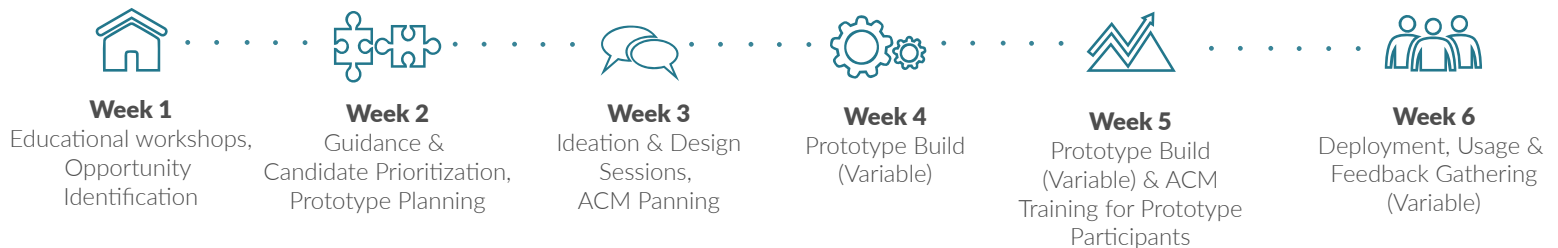

Cost effective | Maximize your licensing and Microsoft investments with the right solution.

Integrated Technologies | Unified technologies to save costs and minimize process alteration.

Experienced Guidance | Expert prototype methodologies to save your organization time and money.

Address Corporate Culture | Engagement of disparate workers through connectivity and collaboration.
