**Microsoft Dynamics 365**

Implementing your strategy

When you're ready to launch your environment, you'll find all the tools and resources you need ready and waiting to guide you through the process and help you scale going forward.
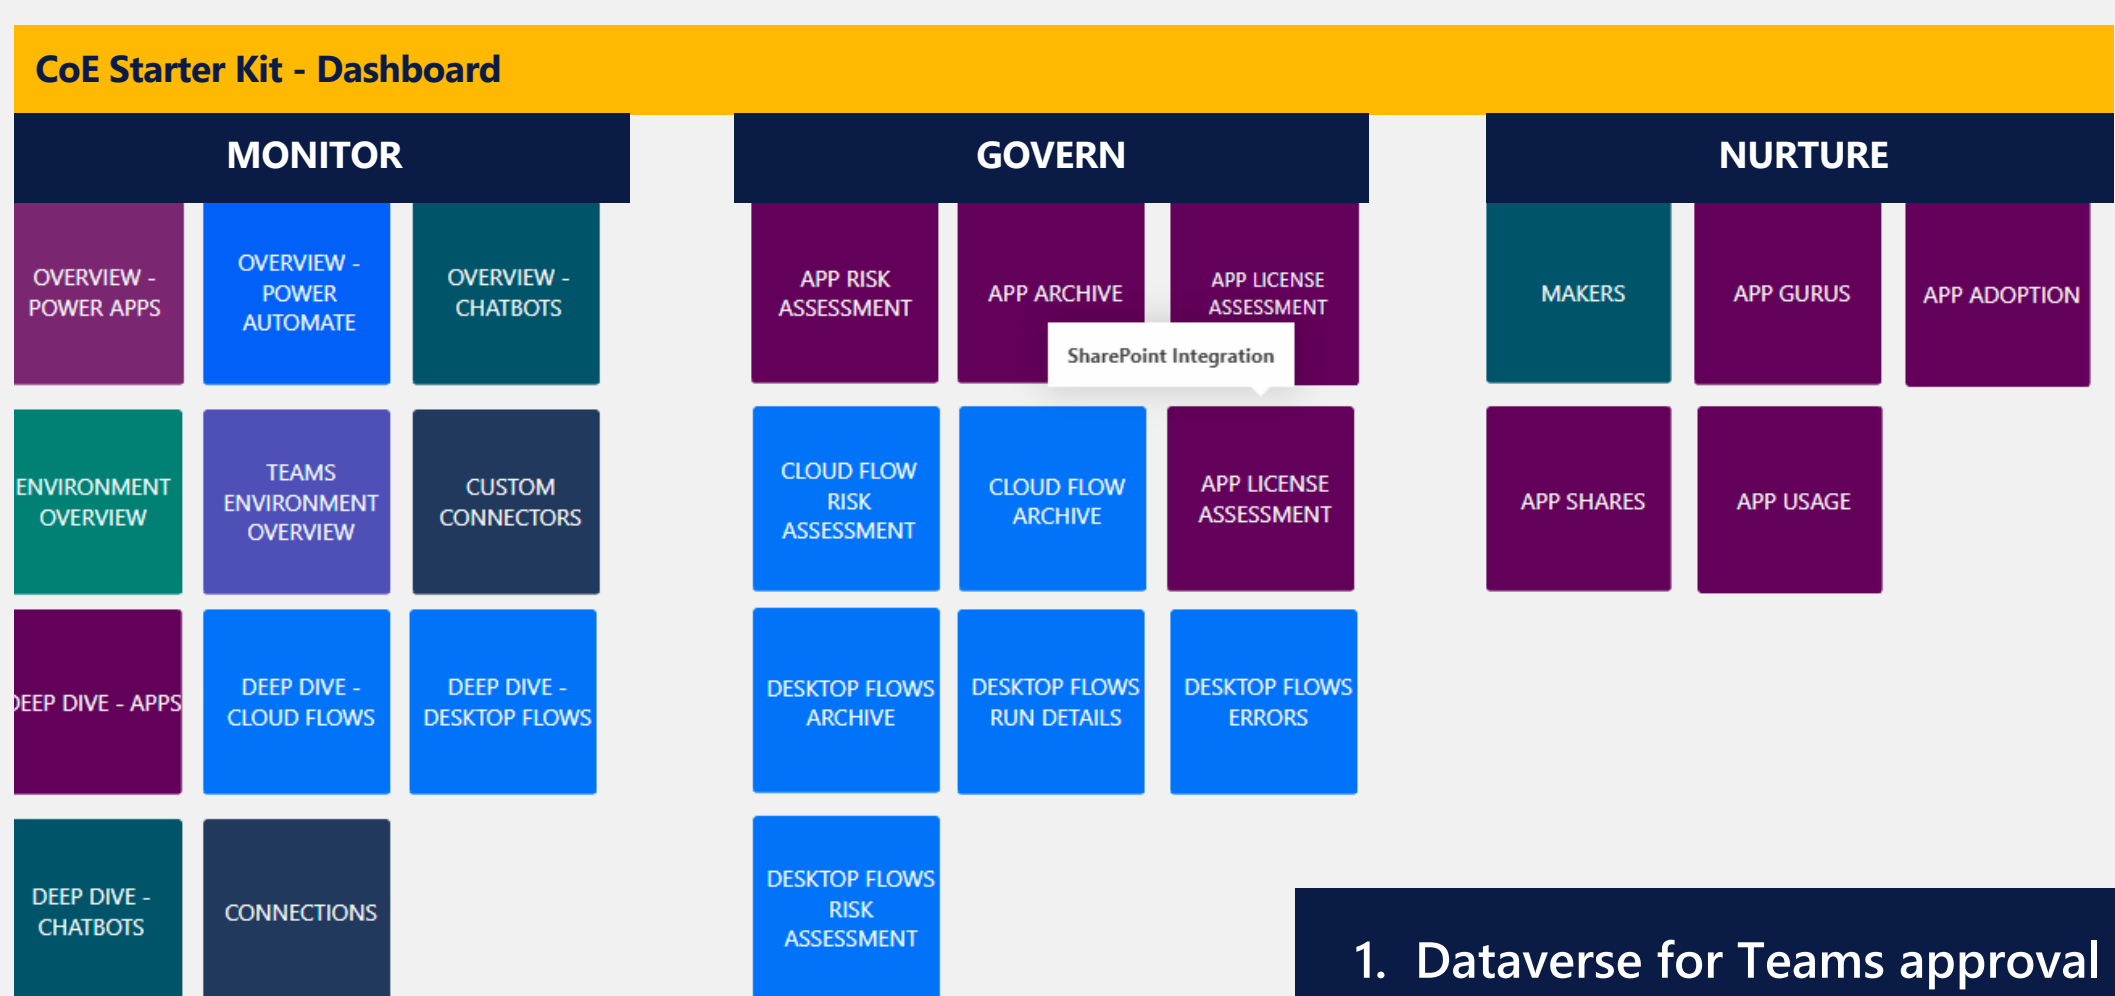

1. Add non-default environments

- Add environment in Power Platform Admin Center
- Assign security group to the environment
- Exclude environment from default policy
- Add environment to new policy

2. Implement the Microsoft Power Platform Center of Excellence Starter Kit

- Inventory
- Monitoring
- Reporting
- Out-of-band processes
