Your (sensitive) business data is out there

Avoid harm. Protect your shared files with Tricent.

— Avoid harm. Protect your shared files with Tricent. —

Have your colleagues shared financial data with auditors? Customer lists with partners? HR and legal files with agencies?

Should these third-parties still have access to your data?

With Tricent you get a chance to act before hackers, competitors and others who are waiting to get hold of your data. Revoke third party access to your files in time, keep your data safe - and make your stakeholders happy.

With Tricent, you keep your shared M365 files and Teams safe through:

- **Automatic workflows and policies**
Let automation revoke third-party access to your files and teams on an ongoing basis.
- **Insight Center**
Get a complete overview of all shared files including legacy files and files shared by former employees.
- **User-driven compliance**
End-users get notified when their shared files need validation.

— Main reasons why businesses choose Tricent —

It's automatic

"Set and forget.
Review or ignore"

- Admins can set cleanup policies and workflows and let Tricent take over
- End-users get notified when shared files need their attention
- Tricent removes third-party access if users ignore the notification

"The real killer feature is that the product is nearly 'set and forget.' "

- Jeremy, IT Director

It's democratic

"Set policies and
involve end-users"

- Businesses get to promote collaboration in a safe and compliant way
- Admins get to set up automated workflows and bulk cleanups
- End-users get a say in what should stay shared with third-parties

"Tricent takes some of the workload off the IT department and puts some of the responsibility on the users who are making the sharings."

- Lars, Chief Information Officer

It's proactive

"Your data stays in
your hands"

- Businesses get to know who has access to their data at all times
- Admin can make sure no file is shared longer than absolutely needed
- By protecting your shared files, you protect your business and your stakeholders

"I'm not as worried about file-sharing anymore. Now the app is proactive for me."

- Martin, IT Manager

Did you know that Tricent's UI is based on Microsoft's own design?
This way users can get started with Tricent in less than 60 seconds.
