

A person is holding a white tablet computer. The screen displays a dashboard with various data visualizations, including three circular gauges at the top, a bar chart on the right, and a bar chart with human icons at the bottom. The background is a blurred office environment with other people and computer monitors.

# Introducing the Hitachi Solutions Modern Data Platform Accelerator

# Hitachi Solutions: Modern Data Platform Accelerator

The Modern Data Platform accelerator provides a short cut to migrate your data to the cloud. In as little as **6 weeks** we can ingest, transform and produce stunning reports and interactive dashboards. Our Modern Data Platform accelerator provides the “glue” that integrates enterprise-grade components such as **Synapse Analytics** to load data from a huge range of sources (such as **Dynamics 365 / CDS**) into a single unified version of the truth, ultimately providing a rich, timely and interactive Data Analytics services across the business.

Key Components: **Azure Data Factory, Data Lake, ADLSG2, Data Bricks, Power BI Premium, Synapse Analytics, SQL Azure.**

# Value from your data: Modern Data Platform Accelerator

---

Fast time to value – in as little as 6 weeks

---

Stand up a flexible and scalable platform

---

Insight across ALL your data – breakdown of silos

---

Improve data governance & security

---

Improve data quality

---

Manage data as a strategic asset for decision making

# Our Goals: Deliver value from your data

## Align technology with business strategy

We ensure to understand the short term and strategic goals for your business & determine what success looks like.

Next, we develop a roadmap to align the technology with this vision, planning the overall delivery to manage expectations and set deadlines.

## Achieve buy-in from business users

Answering the “So what? question” is all important. Hitachi ensures that our MDP solution gives the business users the insight they need.

We provide true self-service analytics that can embed data-driven decision making into day to day business processes.

## Deliver value & data insight quickly

Using our Modern Data Platform Accelerator we stand up the infrastructure quickly and focus on delivering value-adding capability.

We use our Consensus methodology to guide and control the implementation and manage risks.

# Why Hitachi: Experienced, Rapid, Controlled Delivery

## Governance

- Using Hitachi's Consensus methodology to control implementation risk
- Established & proven agile processes that deliver data insight quickly

## Experience

- We have delivered many successful implementations in multiple industry sectors
- We have extensive expertise working with Dynamics 365, Power Platform and other ERP platforms

## Adapt & Extend

- Integrates with existing systems & supports future LoB applications
- Provides support for modernisation projects (cross-over reporting, data migration)

## Technology Framework

- Automated deployment of Azure PaaS components to quickly stand up an enterprise class data platform
- Includes metadata-driven control, orchestration & management of data analytics which is fully integrated into an optimised Azure DevOps environment with CI/CD pipelines.

## Continuous Investment

- Aligned to Microsoft's roadmap, we invest in the framework to adapt to changing technology (e.g. Synapse Analytics) and to add enhancements
- Open IP – there's no lock in & we don't protect the source code

# Our Solution: High-level Modern Data Platform Architecture

**Provides single version of truth for all data in an organisation**

- Based on Microsoft's reference architecture
- Uses Power BI interactive dashboards and paginated reporting
- Data from any source: structured, semi-structured & unstructured data
- Optimised for both analytical processing and data archiving
- Aligned with Microsoft's roadmap for Dynamics 365 (FinOps, Talent, Customer Engagement, Field Service) and Power Platform
- Supports data governance and privacy initiatives for GDPR
- Preconfigured solution, to be customised to meet business objectives. Avoids re-inventing the wheel
- Scalable for future AI and data science initiatives using Azure Databricks

# Our Solution: Three options to deliver value

## MDP Lite

- ✔ Obtain insight into a single business area
- ✔ Establishes the foundation to scale and extend your data estate in the Cloud
- ✔ Accelerate your journey towards data driven decision making based on industry best practices
- ✔ Benefit from all the Cloud features including security, geo-redundancy and cost savings
- ✔ Typically 6 weeks implementation & £60K investment

## MDP Standard

- ✔ Obtain critical insights into multiple business areas
- ✔ Move your data estate to the Cloud, separated by storage and compute to obtain infinite scalability
- ✔ Leverage accelerators to drastically reduce time to market and drive value faster
- ✔ Enable your team to own the final solution
- ✔ Scale with the growth of your organization
- ✔ Benefit from all the Cloud features including security, geo-redundancy and cost savings
- ✔ Typically 10 weeks implementation & £175K investment

## MDP Premium

- ✔ Scale your business with multiple MDP iterations and measure value continuously
- ✔ Obtain critical insight across your entire enterprise
- ✔ Move your data estate to the Cloud, separated by storage and compute to obtain infinite scalability
- ✔ Data Governance & MDM Strategy to ensure high quality data across multiple business areas
- ✔ Typically 15 weeks+ implementation £PoA investment

# Our Plan: MDP Rapid, iterative, controlled development

\*\*A typical "MDP Standard" implementation plan is shown above. All timings are indicative and would be adjusted in line with results of Inception phase – e.g. optional further modules in Construction phase may or may not be warranted.

# Our Support: Lifetime Services

Hitachi Solutions **offer round the clock support** for all your data science and analytics **incidents, problems** and **quality control gateways**.

Our Lifetime Services team leverage the founding principles of Hitachi, priding themselves on supporting the delivery of continual success and innovation to the organisations we work alongside. We have **450 support staff across 6 global Centres of Excellence** available to support organisations across the globe **24/7**.
