

1 Day Databricks Hackathon for Retail

Quickly facilitate innovation and Databricks solutions for your workforce

Accelerate your retail organization's productivity with Blueprint's 1 Day Databricks Hackathon for Retail. Databricks is the fastest growing analytics and machine learning platform in the tech industry. Our hackathons drive the creation and launch of new Databricks powered solutions, accelerate the training of your workforce, and develop a solid internal culture around practical Databricks usage.

Impact

Quickly generate solutions with nearly 30 different Databricks solution accelerators that range from customer lifetime value to threat detection with DNS analytics.

Advance the analytical capabilities of your organization with a series of best practices and patterns with Databricks and your Modern Data Estate.

Jumpstart your organization's effectiveness with Databricks via hands-on practical training.

The Blueprint Way

Facilitated by our group of Databricks specialists, single day hackathons can be held onsite or virtually. The curriculum for our single day hackathons can be adjusted to all technical skill levels across any department within your organization. Regardless of where you are at on the journey with Databricks, a hackathon can help accelerate the value you're getting out of this amazing platform.

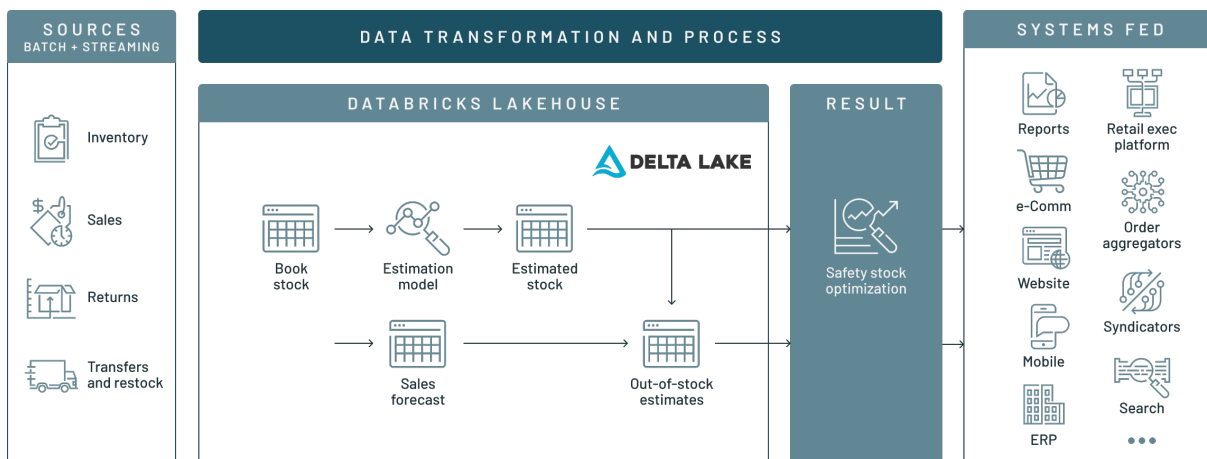

Use Cases

Demand Forecasting

Safety Stock Analysis

Customer Lifetime Value

Transaction Enrichment
