AZURE SYNAPSE LINK FOR DATAVERSE 2-4 HOUR BRIEFING

Now it's easier than ever to benefit from real-time insights into your data in Microsoft Dataverse by using Azure Synapse Link.

Because of a tight seamless integration between Dataverse and Azure Synapse Analytics, Azure Synapse Link enables you to run analytics, business intelligence, and machine learning scenarios on your data.

When you use Azure Synapse Link for Dataverse for your business, you get a service that offers scalable high availability and disaster recovery for big data analytics. The data is saved in Common Data Model format, ensuring semantic consistency across apps and deployments.

We will discuss your business objectives and assist you in identifying areas of opportunity for scaling your organization during this briefing. We will also provide you with a demonstration of the Azure Synapse Link's effectiveness.
