Maximise your SAP investment while setting up for the future
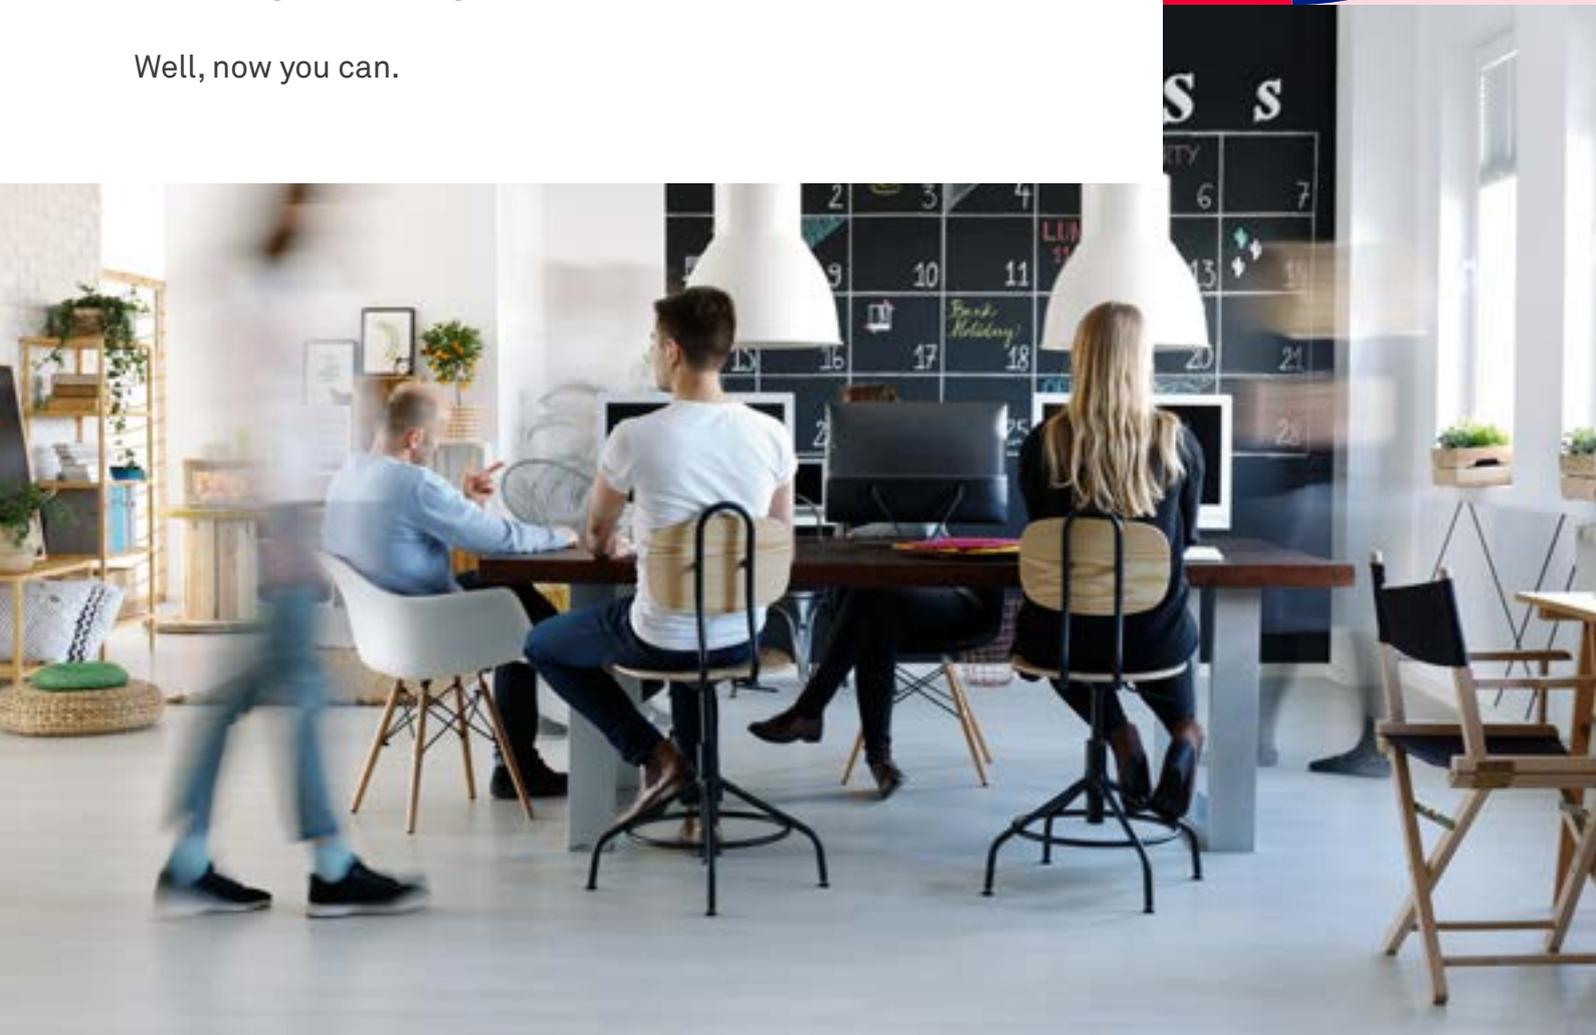

Wouldn't it be good if you could maxmise the benefits of SAP with Azure —enhancing the scalability, cost-effectiveness, and security of your ERP —while spending more time on innovating and running your core business?

Well, now you can.

Introducing T-SAP

Your ERP is the digital backbone of your business, which means ensuring it's up and running effectively is critical to your operations. However, constantly having to refresh and manage your environment can be costly and time consuming.

That's why we've introduced T-SAP. By moving SAP to a managed Azure environment, you gain the flexibility and agility you need to future-proof your business, without the pressure of keeping everything on and optimised yourself.

T-SAP is the best of both worlds.

Designed and built with a focus on leveraging modern, market-leading Azure infrastructure and benefits, it provides the foundation for your competitive advantage.

Platform implementation
Install a production platform with Azure, with 99.95% service availability and SLAs to match.

SAP migration & management
We'll migrate and manage your SAP so you can spend more time on innovating your core business.

Intelligence and insights
Migrate ERP data to Azure Synapse to unlock the potential of your data and improve operations.

Managed end-to-end
Ensure your SAP is always on, patched, and upgraded— with a single point of accountability.

How Azure enhances SAP

Scalability
Scale tech and operational workloads seamlessly with enhanced agility.

Cost efficiency
Shared management platform reduces operational costs and increases transparency.

Agility
Provision apps faster and deploy more frequent "value drops" with integrated DevOps.

Innovation
Collate and manage all your data for better insights and data-driven innovation.

SAP on Azure benefits

Security
Enhance security and meet compliance with world-leading threat intelligence.

Why move SAP to Azure?

Microsoft is SAP's highest accredited partner, opening the door to more benefits by optimising SAP for Azure—enhanced by our strong partnerships to amplify Azure's capabilities in T-SAP.

Seamless experience
From engineers sitting in the same office to combined support models, our focus is seamless experience.

Enhance data opportunities
Integrate your SAP and non-SAP data on Azure to create real-time, BI-enhanced dashboards.

Robust security
Azure offers SAP /HANA certified VMs to run mission-critical apps in more regions than any other provider.

Access more innovation
We're constantly co-developing product integrations, best practices, and reference architectures to enhance innovation.

Helping you on your journey to maximising SAP

We can help you get the most out of your current SAP investment while seizing the S/4HANA opportunity. We'll help you transition to Azure to better transform for the future and enhance your competitive edge.

SAP assessment
We assess your current SAP infrastructure, outline a clear business case, and demonstrate short and long-term future business benefits.

SAP optimisation
Move key workloads to Azure, with real-time disaster recovery, to enhance agility, flexibility, and cost efficiency with reduced risk.

S/4 HANA transformation
Transform your business with the move to S/4 HANA, guided by our strategic approach and executed with our experts on-the-ground.

SAP analytics
Obtain actionable insights from your SAP, integrating data and using Azure's advanced analytics to gain a competitive edge.
