

# Bank Transactions Import and Export

# Who is it for?

**Bank Transactions Import and Export** is an application that allows import and export of account statements following the format of each bank institution. The app provides predefined integrations setups with some of the banks situated in Bulgaria. All requirement files for account statements meet the international standard MK940, which has been implemented by the Bulgarian banks in a non-standard way, thus hampering the use of the out-of-the-box Business Central functionality. The application is operating in compliance with other international and local financial standards to ensure seamless data exchange and banking operations.

## It is a perfect tool for:

- Companies that are working with many partners who use bank transfer as a payment method.
- Organizations that are performing lots of bank transactions.

The application is integrated with Dynamics 365 Business Central.

**Bank Integrations** is available on Microsoft AppSource.

# How will you benefit from it?

## Features

- The import feature allow companies to import account statements with any bank file format.
- The app provides out-of-the-box setup for importing account statements from the UniCredit Bulbank, DSK bank, UBB, Pariba, and Procredit bank.
- Setting up reconciliation of collection operations and of bank POS terminals operations are possible through the app.
- You can set up bank integration export for Credit, Budget, or Foreign payments.
- Available out-of-the-box export functionality for UniCredit Bulbank.
- Import and export integrations with other banks can be setup additionally.
