

Advanced Process Automation for PBX Assessment, Planning & Provisioning from On-prem to the Cloud

We Deliver...

- Smart **SaaS based** process automation, developed by a creative team of senior migration experts

Key Business Value...

- **Visibility:** make project resourcing & budget decisions based on **real data** from source PBX...not assumptions!
- **Cost:** savings in **time, resources, error** re-work, day 2 issues etc.
- **Speed:** reduced **time to deployment**
- **Reduce Risk:** business continuity, compliance, **data integrity**

Project Monitoring Dashboard

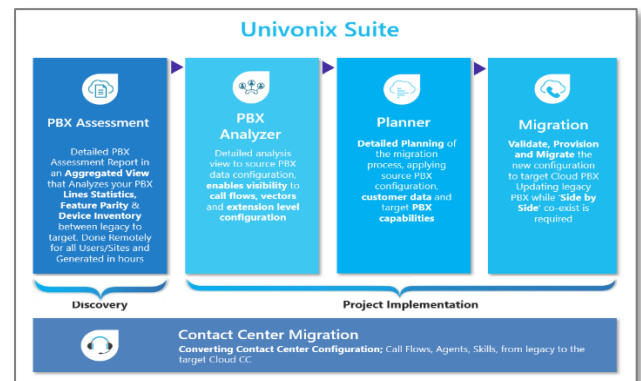

Key Benefits...

- Supports a **phased migration** approach and **enables coexistence** of legacy PBX and cloud PBX
- Detailed legacy to target **configuration mapping & feature parity analysis** down to extension level
- **No interference** with customers production phone system, PBX or network
- Planning & Provisioning **validation** steps to avoid service interruptions
- **No legacy PBX expertise** required

The Univonix Migration Suite is a process automation SaaS platform enabling a seamless, accelerated migration from legacy PBX to Cloud PBX. The platform delivers full visibility and assessment of your legacy PBX and provides a comprehensive set of planning & provisioning tools to enable a rapid and successful migration project

The Univonix Migration Suite:

is a partner centric 'self-service' process automation platform that gives System Integrators, Service Providers, Solution Vendors and customers access to 'best of breed' technology!

The Univonix Automation Suite

Univonix PBX Assessment

delivers an aggregated view of all users, extensions & devices on the legacy PBX. Includes feature parity analysis between source PBX and target PBX. Migration readiness analysis of users, extensions, devices, hunt/pick-up groups, call park etc. and device hardware inventory breakdown

Univonix Planner

enables automated mapping of users, devices, hunt/pick-up groups and rule-based E.164 number conversion. The tool will surface issues, conflicts and dependencies down to the extension level. The system tracks issue resolution progress and runs a full set of validations to verify migration plan integrity.

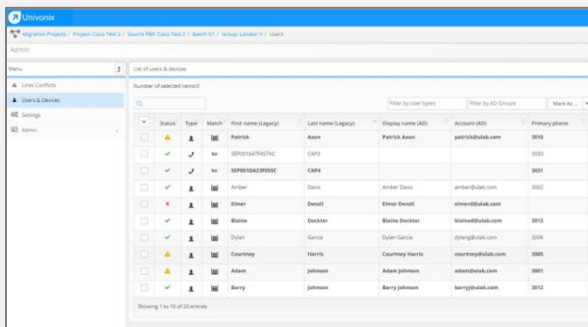

For Partners...

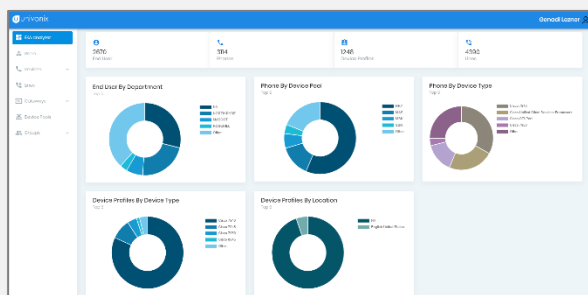

- **Self-Service** intuitive SaaS platform
- **No legacy PBX expertise** required
- Step by step **migration methodology**
- The tool will manage large 'complex' **enterprise migrations** with thousands of users across multiple PBX's
- **White Labeling** for partners, vendors, system integrators and service providers

Migration Service Coverage...

- **Devices:** Stations & Attendant Consoles
- **Groups:** Hunt Groups, Pickup Groups, Coverage Answer, Intercom Groups, Trunk Groups, Page Groups, Call Parks
- **Phone Types:** IP phones, CAP, analog phones, FAX, Conference rooms
- **Supported Legacy PBX's:** Avaya, Cisco, Mitel, Nortel, Siemens and more!

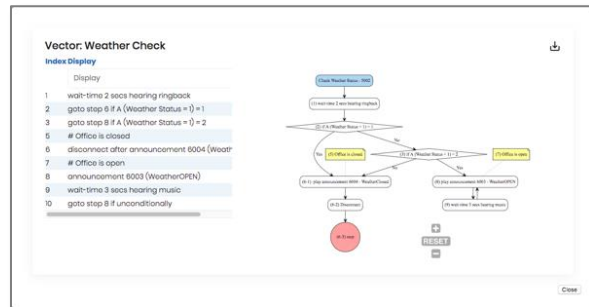

User & Device Web Interface

Detailed PBX Analysis Dashboard

Univonix PBX Analyzer

provides a detailed analysis of the source PBX configuration. Enables full visibility of PBX data such as extensions, features, devices/stations, hunt groups, pick-up groups etc. as well as IVR/contact center call flow visualization

Call Flow Visualization

Univonix Migrate

executes the migration plan, by provisioning the target PBX following an in-depth validation process that checks the required licenses are available, the correct phone numbers were ported etc. In addition, Univonix Migrate can automatically generate a configuration file for the legacy PBX to support 'side by side' coexistence

"...moving from legacy communications to modern UC technologies, is complex. We are excited to see Univonix offer Migration Automation to ensure our customers achieve fast benefits realization & ROI..."

Paul Cannon, Senior Product Marketing Manager at Microsoft

The Univonix Suite will save you significant time, resources and money when migrating to your new system, helping you deliver a near frictionless end user adoption experience.

Univonix 'Planner & Migrate' are most effective in the following scenarios:

- **Enterprises:** over 1000 extensions
- **Multiple PBX Environments:** with several PBX's, same or different types
- **Coexistence:** legacy PBX is still required
- **Mergers & Acquisitions:** consolidating users to one cloud platform
