

# Infrastructure Management by InTTrust Azure Arc

# InTTrust accelerates innovation across Hybrid and multi-Cloud environments

InTTrust by leveraging advanced insights of Azure Arc offers simplified management, faster app development, and consistent Azure services.

Our Microsoft experts enable you to secure and govern infrastructure and apps anywhere, build Cloud-native apps faster with familiar tools and services to run them on any Kubernetes platform, and modernize your data estate with Azure data and machine-learning services.

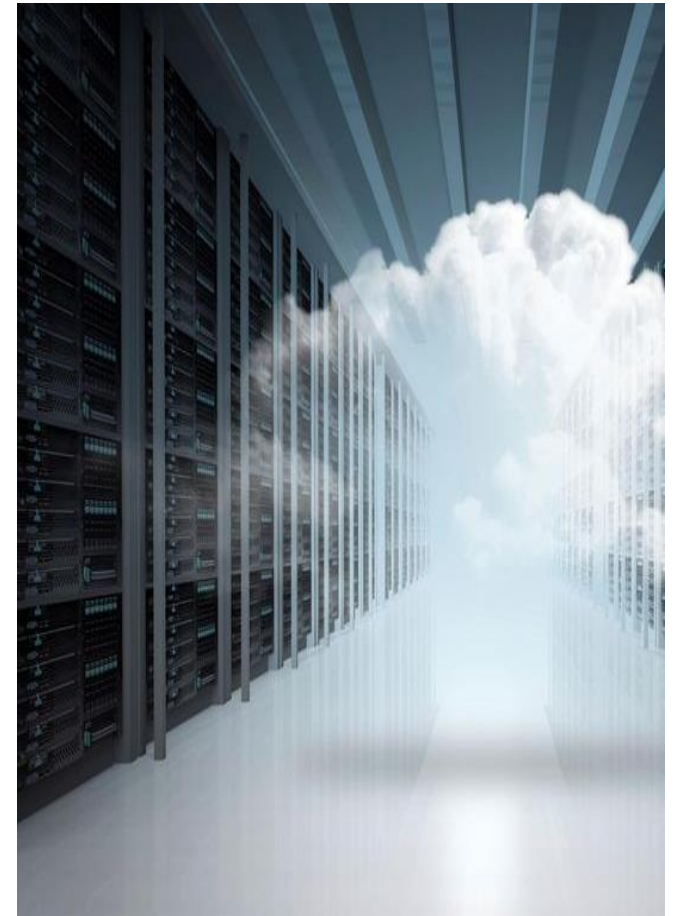

Extend Azure management and security to any infrastructure

Run Azure data services anywhere

Expanded Azure Stack offerings for any edge

# Infrastructure Management Overview

InTTrust can guide you to achieve your desired cloud computing state across hybrid cloud environments and software-defined-datacenters. We can help you improve IT management capabilities and analytics, providing your business with tangible value demonstrated in lowered cost of ownership, and improved asset flexibility.

## Planning

- Inventory and organize current resources
- Discuss current issues
- Develop organization management plan

## Deployment

- Prepare underlying infrastructure

## Manage and operate

- Enable planned management features
- Manage notifications

# Infrastructure Management Goals

Innovate across Hybrid and multi-Cloud environments with the Infrastructure Management services by InTTrust.

InTTrust by using the Microsoft Azure Arc set of technologies enables you to:

- change the way you look at Hybrid, multi-Cloud and on-premises infrastructure
- modernize your business operation
- achieve ease of management and daily operation processes

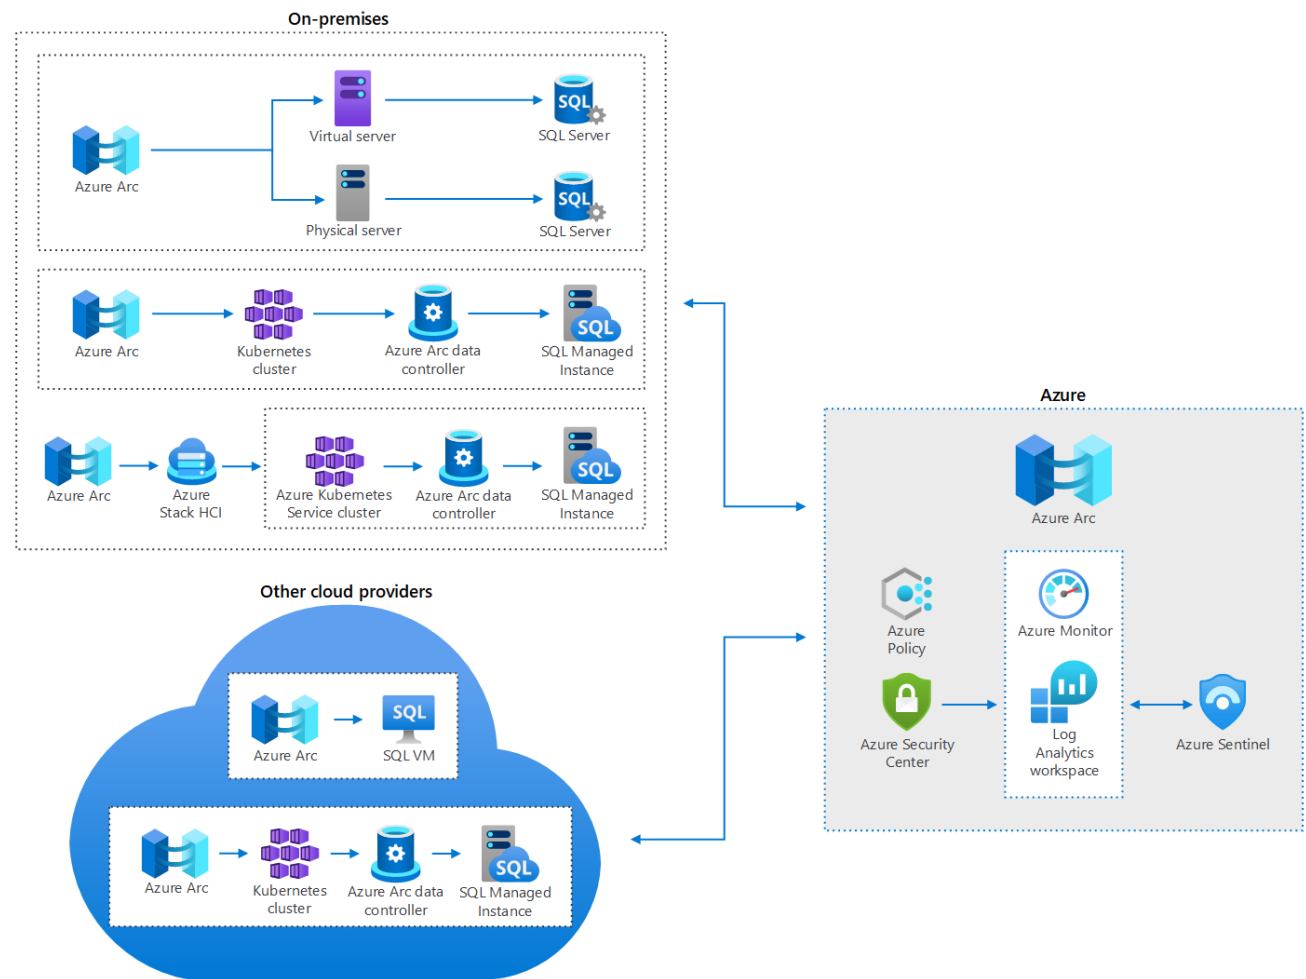

# Infrastructure Management Outcomes

InTTrust can help you transform your business into a modern enterprise that delights customers, empowers employees, and simplifies your operations.

Here's just a few of the great outcomes:

- secure and governance of infrastructure and apps anywhere
- build Cloud-native apps faster with familiar tools
- run services on any Kubernetes platform
- modernize your data estate with Azure data and machine-learning services
