Enable modern endpoint management with Wragby and Microsoft

The ability of employees to connect to business data no matter where they are and from any device is a significant benefit in today's world, but it can open up your business to security risks. Enable your employees to do their best work on any app, device, or network—while protecting company data—by modernizing the way you manage every endpoint.

With the right endpoint modernization strategy, employees get a secure experience on every mobile device, tablet, or laptop they're using, all while eliminating major management headaches for IT.

51%

of organizations are ineffective at surfacing threats because their endpoint security solutions are ineffective.[1]

Let Microsoft help you enable secure and productive hybrid work

With Microsoft and Wragby, get the tools and services you need to manage mobile, desktop, and virtual endpoints while enabling secure access to corporate resources from anywhere.

Empower employees with modern technology	Simplify device management and security	Secure your hybrid work environment	Enable a connected, secure workplace

Wragby has the expertise to move your organization ahead

Wragby is an elite Microsoft Partner with a pedigree of first and Gold Competencies in Microsoft Cloud Services which include: Cloud Productivity, Cloud Platform, Security, Application Development, Data Analytics and Enterprise Resource Planning.

With our Endpoint Management Managed Advisory Service Offering, we empower you on how to enable your users to be productive, on any device, without compromising IT security. We'll help you manage and protect your devices, your apps, and your users through intelligent security, risk-based controls, zero-touch provisioning, advanced analytics, and deep integration to the Microsoft products you already use.

Optimize endpoint management with the Microsoft Endpoint Manager

A unified platform using Microsoft Intune and Configuration Manager to modernize management of all your endpoints as part of an end-to-end Zero Trust security strategy. Some of the key benefits of our solution are:

- Simplify configuration and management across OS types
- Secure all endpoints, both managed and unmanaged
- Enforce device risk-based Conditional Access controls
- Future-proof your investment with co-management
- Manage and secure your digital estate for hybrid work

Manage and protect your devices, your apps, and your users
Endpoint Management Managed Advisory Service

Our Endpoint Management Managed Advisory Service offering provides an executive deep dive into remote deployment, management, and the security of corporate and BYOD devices in your organization. Our goal is to show you the best ways to manage endpoints at the enterprise level. We'll provide you with the ability to protect your authorized users' identities so you can authenticate credentials and manage access while still giving users the freedom to collaborate with others.

We'll customize the Managed Advisory Service based on your organization's needs

Engagement set up
