## Triad expertise spans many Microsoft technologies

**Azure** | Our team have architected and delivered major Azure environments, getting the most from its core service and associated features such as DevOps, CI/CD, Test Automation, Containerisation and Kubernetes.

**Azure Data Lake** | A no-limits data lake to power intelligent action. Triad can help you to store and analyse petabyte-size files and trillions of objects. Azure Data Lake is a cloud platform designed to support big data analytics. It provides unlimited storage for structured, semi-structured or unstructured data. It can be used to store any type of data of any size.

**Bespoke line of business systems** | Our developers and engineers utilise Microsoft technologies such as .NetCore to create modern, UX-centric, bespoke systems.

**Dynamics 365** | We help SMEs and multi-nationals achieve a unified view of customer and operations data by combining our delivery experience with the power of Dynamics 365.

**GIS and Geospatial** | Professional GIS systems are often complex and expensive, targeting expert users. Triad's expertise allows our clients to embed cost effective, feature rich integrated mapping into our Microsoft systems.

**Office 365 and SharePoint Online** | Across fully cloud and hybrid, our teams have advised clients on maximising their ROI from Microsoft SaaS cloud and delivered combined services to multiply it.

**PowerApps, Flow, Logic Apps and Azure Functions** | Under the guidance of our Power Platform MVP, Triad's team are constantly innovating with clients to leverage the benefits of low code.

**Teams and Viva** | Our Triad consultants can help connect Microsoft Teams and Viva to line of business applications, automate processes with low code solutions, modernize meeting experience or meet advanced scenarios with custom development. We enhance the employee experience, bringing communications, knowledge, learning, resources, and insights in the flow of work.

**PowerBI** | Power BI is a business analytics service by Microsoft and part of the Microsoft Power Platform. Triad Consultants can help provide interactive visualizations and business intelligence capabilities with an interface simple enough for end users to create their own reports and dashboards.

**WorkPoint 365** | WorkPoint 365 is a standardized document management and process management for Microsoft 365. The WorkPoint solution bridges any gaps in Microsoft 365, enhancing the user experience and helping employers regain control of how projects and contracts are managed and governed. The solution sits on top of Microsoft 365.

## WorkPoint 365 partnership; Triad are the UK's number one WorkPoint 365 specialist.

Triad and WorkPoint are helping accelerate Microsoft 365 benefits to clients. The WorkPoint solution pulls all the Microsoft components together and bridges gaps for clients efficiently. Giving clients back control of projects and document management with the WorkPoint 365 solution includes standardising workflows and giving visibility of critical information.

**"Everyone is really excited about this partnership – our client focus, cultures and passion for technologically enabled business benefits are fantastically aligned."**

**Bendix Olsen** | Chief Commercial Officer, WorkPoint

### CLIENTS

#### Dalcour Maclaren

- Triad helped Dalcour Maclaren, a leading survey and land management company, move to Agile development during the design and delivery of its first, unified client project, documentation, and geospatial management system.
- The new system was conceived to deliver a significantly enhanced client experience across project and document management, coupled with self-service usage and an innovative cloud-based infrastructure.
- Working collaboratively to Dalcour Maclaren's brief, Triad recommended a Microsoft hybrid cloud architecture to make best use of the licenses and their existing on-premises solution.

**"The redevelopment of our Scheme management database was incredibly important. Working with Triad enabled us to convert and improve many of our aspirations into easy to use process management tools that created a competitive advantage from day one."**

**Andrew Roberts** | Project Sponsor, Dalcour Maclaren

#### FootAnstey

- Triad was selected to work with the CTO of Foot Anstey an award winning top 100 UK law firm and a top ten firm for revenue growth in the legal sector to accelerate digital transformation plans.
- Following on from the successful delivery of the digital transformation strategy, during its implementation phase, Triad was again selected to provide consultancy and guidance on data strategy and AI strategy.
- Architecture and development guidance has helped Foot Anstey with their existing Azure Data Factory configuration and planned Azure Data Lake implementation.
- An advisory role on the customisation of a Power Platform application sitting on Microsoft Data verse includes the use of Power Portals and Bot technology to deliver a vastly improved customer engagement platform.

- Triad consultants enhanced clients' capabilities across Microsoft. NetCore, Azure, Kubernetes and DevOps.
- Our Renewable Transport Fuels Obligation / Greenhouse Gasses system enables DfT to ensure freight companies adhere to strict climate legislation. Our solution is built using end-to-end DevOps automation allowing services to be spun up and shutdown as required and along with a full automated CI/CD pipeline ensuring automated testing and deployment.
- Triads work with DfT was recognised at the 2021 Digital Leaders awards and BCS & Computing UK IT Industry Awards.

## Global leader in the development and management of solar energy projects

- Our consultants are working with this global leader in the development and management of solar energy projects to solve issues with the proliferation of unstructured information and documents surrounding projects.
- Triad are delivering WorkPoint 365 solutions to sit on top of the Microsoft 365 platform, enabling them to regain control of managing projects and documents by standardising workflows and giving visibility of critical information.
- We are delivering this solution incrementally through Triad's 'Pilot' approach.

## Global renewable energy company

- Triad built a project management tool on the Microsoft 365 platform to manage the building of wind and solar farms. The platform will provide a facility to run Obeya team meetings each week and will enable project management through the phases of the farms lifecycle.
- Replaced an existing Nintex workflow solution for the approval and control of documents, with a Power Platform based workflow solution that centralised the management of the workflows into a central location, which has made updating the workflows centrally much easier.
