Data Protection Survey Findings
Ponemon/Entrust

Data in cloud

60%

of organizations transfer sensitive or confidential data to the cloud (encrypted or unencrypted)

Sensitive data

65%

of organizations say the biggest challenge is to know where their data is located

Data Encryption

30%

of organizations have an information protection strategy

SYNERGY
ADVISORS

What kind of risk are we going to mitigate?

- Sensitive data loss
- Unknown file location, file type, content type, incorrect classification, etc.

What is the business value?

- In a centralized and efficient way, E-Inspector offers full inventory and classification capabilities, through policies, resulting in a complete report about your data
