Microsoft Entra Permissions Management

Discover, remediate, and monitor permission risks for any identity and any resource across your cloud infrastructure.

As organizations massively adopt a multicloud strategy, several trends are stressing the need for better visibility and tighter control for cross-cloud access management.

65% of IT Decision Makers worry about data breaches when thinking about excessive permissions in their environment.

75% of IT Decision Makers say that real-time cross-cloud permission discovery and analytics is the most critical capability to efficiently manage permissions in IaaS and PaaS.

What is Microsoft Entra Permissions Management?

Permissions Management is a cloud infrastructure entitlement management (CIEM) solution that provides comprehensive visibility and control over all permissions for any identity and any resource across all major clouds – Microsoft Azure, AWS, Google Cloud Platform – and identity providers. It provides a unified platform where you can assess, manage, govern, and protect permissions and identities consistently.
Permissions Management helps you strengthen your security posture by enforcing the principle of least privilege across your entire digital estate.

Benefits of Permissions Management

As organizations massively adopt a multicloud strategy, several trends are stressing the need for better visibility and tighter control for cross-cloud access management.

- **Get granular cross-cloud visibility**
  Get a comprehensive view of every action performed by any identity on any resource.

- **Enforce least privilege**
  Right-size permissions based on usage and activity and enforce permissions on-demand at cloud scale.

- **Uncover permission risk**
  Assess permission risk by evaluating the gap between permissions granted and permissions used.

- **Monitor and detect anomalies**
  Detect anomalous permission usage and generate detailed forensic reports.

Permissions Management helps you strengthen your security posture by enforcing the principle of least privilege across your entire digital estate.
