

Migration from Oracle to Azure Database for PostgreSQL

Empower innovation and agility with an open-source culture

Take control of rising licensing costs and enable business agility and innovation by migrating Oracle to PostgreSQL. As the most advanced open-source database, PostgreSQL is the leading cloud-native RDBMS solution, providing optimal performance and reliability. Blueprint brings the expertise required to assess, evaluate, and successfully migrate Oracle to PostgreSQL so you can build for the future now.

Impact

-  Minimize cost and maximize speed of migration with 99% compatibility between Oracle PL/SQL and PostgreSQL
-  Deliver scalable solutions with agility based on requirements rather than budget constraints
-  Facilitate innovation by making software available to deploy quickly without worrying about who to pay and how much it will cost
-  Enable a highly adaptable and reliable IT architecture with optimal performance and flexibility

Unlock greater ROI potential by leveraging PostgreSQL and open-source technologies.

Sample Use Cases

- Licensing Restriction and Cost Reduction
- Modern Data Engineering Adoption
- Open-source Innovation Agility
- IT Architecture Modernization
- On-Demand Database Deployment
- Software Delivery Acceleration

The Blueprint Way

PostgreSQL and open-source database platforms deliver the power to innovate and iterate back into your hands. We begin with high-impact use cases to prove value quickly, then iterate, mature, and scale to meet your needs. Using this open-source license model, Blueprint enables the strategy to achieve your business goals and deliver ROI with a cloud environment made to maximize agility, adaptability, and performance.

Oracle to PostgreSQL Migration is one of Blueprint's many Digital Transformation solutions. Ask us about the other solutions we offer.
