

Amidst ever-changing compliance and regulatory requirements, ARMED™ cuts through the noise, enabling defense industrial base organizations to manage a complete cybersecurity program. ARMED™ provides radical transparency and the control companies need to demonstrate compliance, win new government contracts, and stay ahead of the game.

SINGLE PANE SECURITY

ARMED™ utilizes a single dashboard to manage your entire cybersecurity program with real-time visibility, notifications, and control. This revolutionary platform is designed to replace as many as 40 separate software tools, bringing everything into one centralized, comprehensive solution.

ARMED™ provides rich graphic visualizations and reports that are easy to understand for both company leadership and technical teams.

COMPLIANCE

Stay ahead of evolving compliance and certifications.

MATURITY

Understand risk, anticipate threats, and scale your program with confidence.

EFFECTIVENESS

Protect, detect, and respond to evolving threats in real time.

MODULES

ARMED™ includes powerful customizable modules to manage a comprehensive cyber risk program built specifically for your unique needs and industry specifications. Everything you see in your dashboard is backed by Conquest's elite team of cybersecurity experts. Our analysts are standing by 24/7/365 to help identify threats and respond to potential issues.

DEFEND

EVALUATE

INSPECT

OVERWATCH

SOC

ARMS ROOM

SHIELD

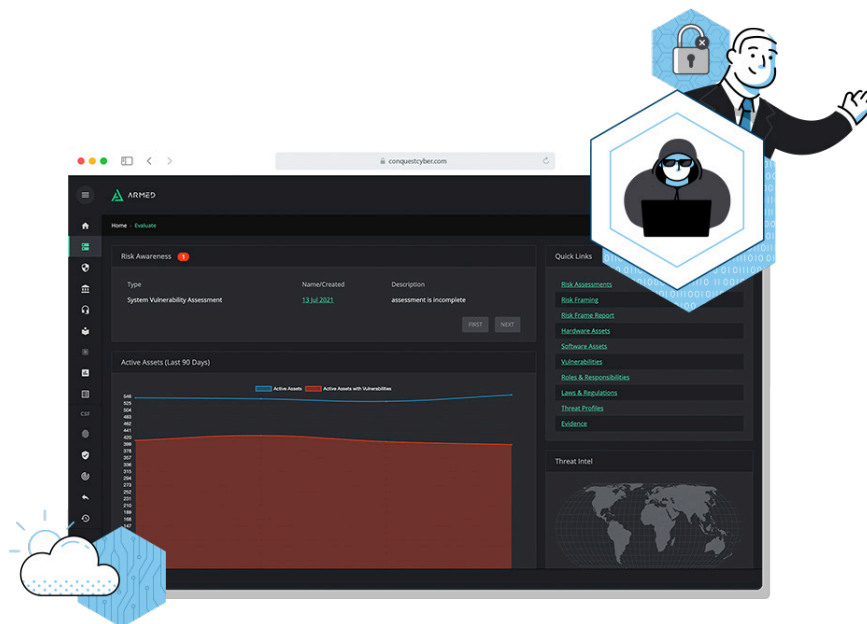

DEFEND

The DEFEND module is the home base for your entire cybersecurity strategy. It gives your organization a real-time view of system maturity, including compliance, risks, threat detection, and more.

EVALUATE

The EVALUATE module provides critical intelligence regarding threats, vulnerabilities, and assets on your network. The key risk variables.

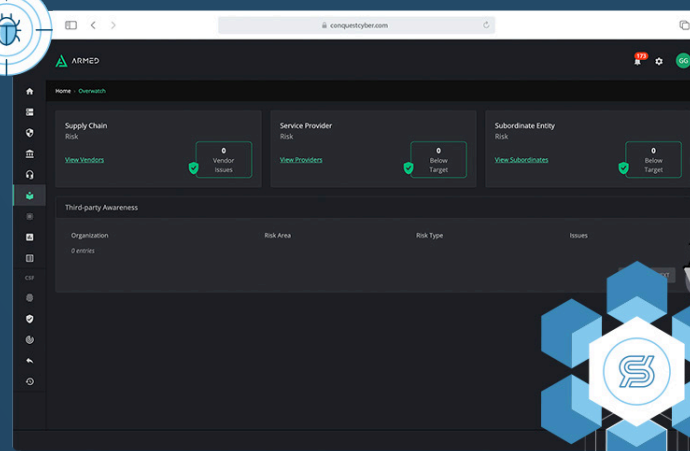

INSPECT

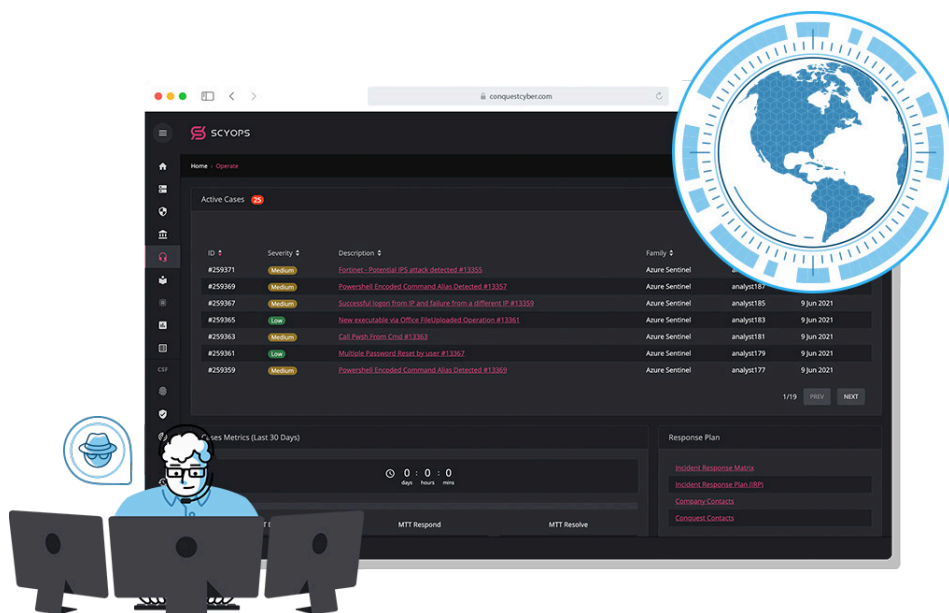

The INSPECT module helps you see how your cybersecurity program stacks up against industry-specific regulations, including CUI, DFARS, DoD CMMC, FFIEC, FINRA, HIPAA, and more. INSPECT provides clear, quantitative progress scores and actionable steps towards achieving full compliance.

OVERWATCH

The OVERWATCH module provides risk evaluation and continuous monitoring across your entire ecosystem, including external providers and supply chain. Even multi-tiered and distributed organizations can monitor complex systems within one view.

SOC

The SOC (Security Operations Center) module provides one centralized view of all security alerts and incidents in your environment. Threats are intuitively organized through a comprehensive ticketing system, and clearly labeled by time, location, and severity. In case of an incident, the SOC module gives you direct access to reporting, response playbooks, and communication plans.

ARMS ROOM

The ARMS ROOM module lets you compare new technologies and solutions against your organization's maturity requirements. This tool empowers you to quickly make smart security decisions and justify purchases based on estimated impact and return on investment.

SHIELD

The SHIELD module is a real-time snapshot of your organization's critical infrastructure, highlighting vulnerabilities with hardware and software assets, and providing the foundation required to protect your organization from threats before they occur.

NOTIFICATIONS

Stay informed 24/7/365. ARMED immediately alerts key personnel of potential issues via email, text, and push notification on your phone.

In case of a problem, the platform also provides direct access to Conquest's elite team of cybersecurity experts.

ABOUT US

Conquest Cyber provides risk management, threat detection, and response services for a wide range of heavily regulated industries where the most sensitive information, data, and systems must be protected from growing cyber threats. Through Managed Security Services, Cyber Risk Advisory, and Digital Transformation services, Conquest enables companies to defend against cyber adversaries, protect their environments, reach and maintain compliance, and take on digital transformations safely.
