CONQUEST | ARMED
CONQUER CYBER RISK

ABOUT US

CONQUEST CYBER IS A MISSION-DRIVEN, SPECIAL-OPERATIONS-LED INTEGRATED CYBER RESILIENCY SOFTWARE COMPANY CREATED TO ADDRESS THE REALITY THAT CYBER RISK IS BUSINESS RISK. OUR MISSION IS TO ENSURE THE CYBER RESILIENCY FOR THE SECTORS CRITICAL TO OUR WAY OF LIFE.

Built on top of the Microsoft 365 Defender (XDR) and Azure Sentinel, critical infrastructure sectors, including federal, defense, healthcare, FinServ, energy, and the industrial base, trust the Conquest ARMED™ platform to connect the dots for security operators by leveraging contextualized asset and software inventory, vulnerability data, threat intelligence, and risk assessment to provide truly risk-informed management, monitoring and incident response. Backed by extensive industry expertise, Conquest Cyber's holistic approach to cyber risk management helps organizations automate manual cybersecurity processes, identify cyber threats, evaluate and manage cyber risk, take preventative action, and strategize remediation.

EXECUTIVE TEAM OVERVIEW

JEFFREY J. ENGLE
Chair and President

**GERARD AMARO**
Executive Director and CRO

SARAH NURSE
SVP of Operations

CINTHYA BEATO
AVP, Corporate Operations and Legal

JASON WEISS
Chief Software Officer

MERCEDES JORGE
VP, Marketing

CHRISTEN PRASSE
Head of Strategic Accounts

DOUGLAS KIM
VP, Cyber Risk

DAN MCINTYRE
VP, Cyber Operations

MICROSOFT PARTNERSHIP

At Conquest we leverage our close strategic relationship with Microsoft to enable XDR and Azure Sentinel through our automation and proprietary approach that drives adoption and active usage of all Microsoft security tools to enable compliant, mature, and effective outcomes for our mutual clients. We have worked very closely with the Microsoft's Aerospace and Defense Team, as well as with other teams across the Microsoft ecosystem.

- Microsoft affiliations:
- Microsoft Gold Partner
- FastTrack Ready Partner
- On the approved ECIF list
- Microsoft Information Security Association (MISA) member
- Part of Microsoft's CMMC Accelerator program

Our experience ranges across Microsoft 365 and Azure clouds with advanced experience in the Government Community Cloud and Government Community Cloud High for Defense Industrial Base customers. Our software adds to Microsoft 365 E5 and Azure Sentinel, allowing an organization to protect its assets from a variety of cyber-attacks and get full visibility and control of their cybersecurity program.

ARMED OFFER - WHO IS CONQUEST

EXTENDED DETECTION AND RESPONSE
WITH ARMED™ + MANAGED SENTINEL

Achieve cybersecurity extended detection and response (XDR) by combining Conquest's powerful ARMED™ platform with managed Microsoft® Sentinel. Organizations rely on a growing number of cloud and online solutions for communications, operations, and sales. Each new tool represents another opportunity for hackers to access sensitive data and disrupt your business. XDR provides exceptional visibility and smart defense measures across your entire attack surface.

ARMED™

ARMED is a complete cybersecurity solution designed specifically for critical infrastructure and highly regulated industries, including healthcare, energy, finance, and manufacturing. ARMED provides radical transparency and the control you need to demonstrate compliance, defend against risk, and stay ahead of the game — all through one centralized platform.

MANAGED SENTINEL

Conquest provides setup and management for Microsoft® Azure Sentinel, fine-tuning a wide range of controls to match your business's unique demands and risk profile. As a Microsoft Gold Partner, Conquest has specialized expertise and tools designed to work with Microsoft security solutions.

ARMED CONNECTS RISK AND OPERATIONS

ARMED applies ongoing risk assessment directly to everyday cybersecurity operations. Factors like your organization's unique threat profile and asset inventory affect how the system escalates/deescalates incidents alerts.

INTELLIGENT SECURITY SOLUTIONS

ARMED enriches raw alerts from Microsoft Sentinel with contextual data from your environment and other external sources across the Conquest ecosystem. It uses machine learning to connect the dots and provides valuable perspective needed to identify critical threats.

SECURITY ALERT → ENVIRONMENTAL CONTEXT → EXTERNAL CONTEXT → ESCALATE/ DEESCALATE AS NEEDED → ALERT

PROTECT YOUR DATA 24/7/365

Cybersecurity personnel are in short supply, and internal teams can no longer keep up with increasingly complex cyber threats on their own. ARMED continuous monitoring keeps you informed 24/7/365. By applying artificial intelligence (AI), contextual data, and risk, the platform helps reduce noise and fatigue so your team can focus on the threats that matter.

EXPERIENCE ARMED XDR + MANAGED SENTINEL

Schedule a demo of our Strategic Cyber Operations platform with extended detection and response (XDR) and Managed Sentinel.
